Revision History

Revision	Date	Description
Rev 2.2	04/2016	• Added the OW cat command description. • Added the PD (PTT DELAY) cat command description. • Updated the MA, MB and RF cat command descriptions with CWR information. • Added to the settings menu list the description of the PTT DELAY menu, number 57. • Added the transmission source section for AM, FM and SSB modes (see **5.10 - Transmission source**). • Updated firmware versions table.
Rev 2.3	06/2016	• Updated the picture in the section **5.1.1.2 - E1 Receiver Settings** with the AGC Threshold parameter. • Updated the section **5.2 - Split Functionality**. • Added to the **5.9 - Settings Menus List** section the description of the PTT ON CW menu, number 58. • Added the TC (PTT ACTION FOR CW) and SP (SPLIT) cat command descriptions. • Updated the section **8.4 - User interface (UI) firmware update**. • Updated the firmware versions table.
Rev 2.4	11/2017	• Added Product Warranty
Rev 2.5	11/2017	• Added the CD (CW Delay), TH (AGC Threshold), FF (FX FUNCTIONS) and TR (PTT with RTS) cat command descriptions. • Moved Firmware Update section in another document. • Updated the firmware versions table.
Rev 2.6	12/2017	• Added the FM MODE menu description, see **5.1.1.8 - Change Operating Mode** and **5.9 - Settings Menus List**. • Updated firmware versions table.
Rev 2.7	05/2018	• Added the CP (CW PARTIAL MESSAGE), CS (CW SPEEDS), TQ (TRANSMISSION POWER FINE LEVEL) and VE (VFOs EQUAL) cat command descriptions. • Updated firmware versions table.
Rev 2.8	06/2018	• Updated the description of the setting menu 34 “TX POWER”. • Updated the VM and TQ cat command descriptions. • Updated firmware versions table.
Rev 2.9	02/2019	• Reviewed section **5.9 - Settings Menus List**. • Added section **1.3.3 - Input and Output Stages Block Diagram**. • Added cat commands descriptions; BH, BP, BR, CK, DE, DF, ET, FM, HT, IA, KT, QS, RN, SA, SI, TV, UD, UU and WT. • Updated firmware versions table.
Rev 2.10	02/2019	• Updated CI cat command description.
Rev 2.11	09/2020	• Reviewed section **7 - Software & Drivers Installation**. • Fixed cat commands descriptions (FT, MR, MW, TL). • Updated firmware versions table.

1 Overview

1.1 Notice

Amateur radio regulations vary from country to country. Check your local amateur radio regulations and requirements before operating the ELAD FDM-DUO.

1.2 Firmware versions

The features described in this manual refers to the following firmware versions :

RX Demodulator	TX Modulator	User Interface	USB Interface	FPGA
Ver. 1.51 Date: 06/09/2020	Ver. 1.36 Date: 01/07/2020	Ver. 4.87 Date: 02/06/2019	Ver. 4.09 Date: 05/28/2015	Ver. 2.00 Date: 07/30/2014

1.3 Introduction

Thank you for choosing the FDM-DUO. It is an innovative dual mode SDR (Software Defined Radio) transceiver covering the frequency range from 9kHz to 54MHz. The FDM-DUO can be used like a standard transceiver in stand-alone mode or in remote mode to exploit the full potential of the ELAD FDM-SW2 software. The FDM-DUO can still be connected to the FDM-SW2 software when it works in "stand-alone" mode.

NOTE: For detailed information about ELAD FDM-SW2 software refer to user manual available at http://sdr.eladit.com/FDM-sw2 20Software/Doc/

1.3.1 Main Features

- Reception frequency range: 9kHz to 54MHz in direct sampling mode.
- Transmission bands: 160m to 6m.
- Selectable output power of 5W or 0dBm RF Out connector.
- Double antenna connectors (RTX for single antenna use or RX/TX for separated antenna use).
- Operating modes: CW, CWR, LSB, USB, AM and FM.
- ADC Linear LTC2165,16bit @122.88MHz.
- FPGA Spartan 6 XC6SLX25 + Serial Flash for stand-alone mode.
- Stand-alone RX demodulator with STM32F4 ARM floating point µController.
- LPC1766 Cortex M3 for LCD & Keyboard control.
- TX modulator with STM32F4 floating point µP + AD9957 DDS @368.64 MHz.
- Clocking source Si5338 driven by 10MHz TCXO or external reference input.
- TX modulator from I2S source: MIC using Cirrus CS5346 or USB integrated Codec (CM6510B codec with customized firmware).
- CAT USB interface with FTDI controller.

1.4 Precautions

- Connect the transceiver only to a power source described in this manual.
- Take care when plugging-in cables, avoid applying sideways pressure that might damage the connectors.
- Avoid operating in wet conditions.
- For better performance and safety, connect the transceiver to good earth ground using a short, heavy, braided cable.
- Ground all outdoor antennas for this receiver using approved methods. Grounding helps protect against voltage surges caused by lightning. It also reduces the chance of build-up of static charge.

2 Panels Description

2.1 Front Panel Description

1 - LCD Display
See LCD Display.

2 - E1 Knob
Available functions : settings of audio volume, squelch for FM, microphone gain (MIC) while transmitting, reception gain control (AGC), noise reduction (NR), noise blanker (NB) and auto notch (AN). See Knobs functions for more information about knobs use.

3 - Main Knob
Available functions : VFO tuning, memory selection in MEM mode, step selection in VFO mode. See Knobs functions for more information about knobs use.

4 - Main audio output for speakers and headphones

5 - Auxiliary audio output

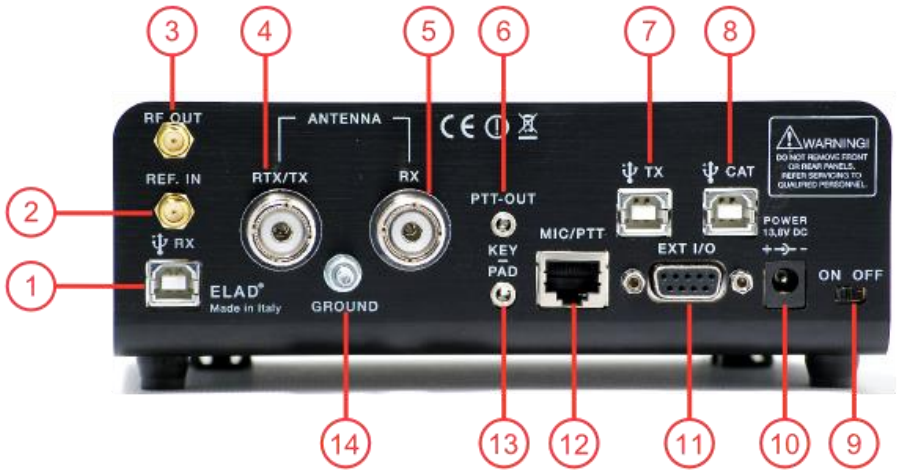
6 - E2 Knob
Available functions : settings of reception filters, transmission power (PWR) while transmitting, CW pitch value, and RIT value. See Knobs functions for more information about knobs use.

© 2020 ELAD S.r.l. All rights reserved. No part of this document may be reproduced, published, used, disclosed or disseminated in any form or by any means, electronic, photocopying or otherwise, without prior written permission of ELAD S.r.l.

7 - MODE and MENU buttons
Operating mode selection (AM, CW, …). Tune mode activation. “QuickStep” function activation. Access to the setup menu. See Keys functions for more information about keys use.

8 - VFO and MEM buttons
Basic VFO and memory operations. See Keys functions for more information about keys use.

2.2 Rear Panel Description



1 - USB Receiver Data Connector
USB 2.0 port. Connect it to computer to use the SW2 software. Please use the supplied cable.

2 - Frequency Reference Input
SMA 50 Ohm connector. Apply an 10MHz 0dBm signal.

3 - RF Output Connector
SMA 50 Ohm connector. 0dBm transmission signal.

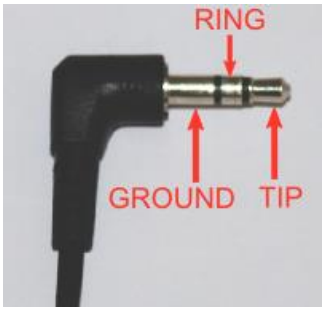
4 - Output/Input Antenna Connector
M-type 50 Ohm connector. Antenna output when using two antenna (TX). Antenna input when using only one antenna (RTX).

5 - Input Antenna Connector
M-type 50 Ohm connector. Antenna input when using two antenna (RX).

© 2020 ELAD S.r.l. All rights reserved. No part of this document may be reproduced, published, used, disclosed or disseminated in any form or by any means, electronic, photocopying or otherwise, without prior written permission of ELAD S.r.l.

6 - PTT Output Connector

3.5mm stereo jack connector. PTT Output to connect a switch-box or an amplifier. This output is enabled while transmitting.



RING: do not connect (reserved for future use)
TIP: PTT output (NPN Open Collector transistor, max.: 20V/200 mA)

7 - USB Audio Connector

USB 2.0 port. Connect it to the computer to access to the FDM-DUO soundcard. In input, allows fully digitals transmissions. In output, allows to access to the received signal in a digital way.

8 - CAT USB Serial Port

USB 2.0 port. Connect it to the computer to manage the FDM-DUO through the CAT (Computer Aided Transceiver) protocol.

9 - Power Switch

Turn on /off the FDM-DUO.

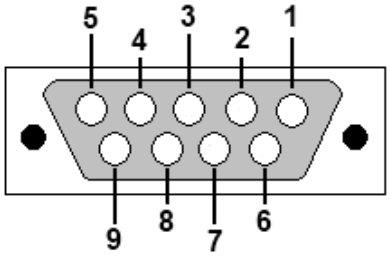
10 - Power Connector

Voltage to apply : 13.8V. Maximum current consumption : 2.5A DC.

© 2020 ELAD S.r.l. All rights reserved. No part of this document may be reproduced, published, used, disclosed or disseminated in any form or by any means, electronic, photocopying or otherwise, without prior written permission of ELAD S.r.l.

11 - Expansion Port

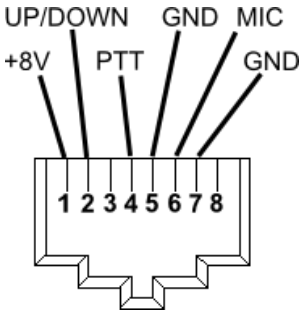
DB9 connector for external hardware. **THIS IS NOT A STANDARD SERIAL PORT.**



- Pin 1: SPI Latch
- Pin 2: I2C SCL
- Pin 3: SPI Clock
- Pin 4: I2C SDA
- Pin 5: Ground
- Pin 6: TX Duo
- Pin 7: RX Duo
- Pin 8: SPI Data
- Pin 9: +5V

12 – Microphone Connector

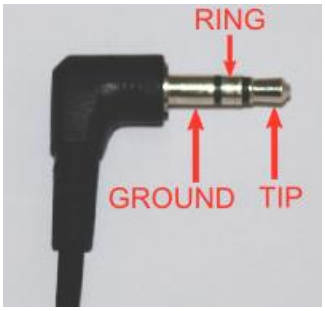
Microphone connector with PTT command. Please use the supplied one. The following image show the connector pinout watching the FDM-DUO rear panel.



© 2020 ELAD S.r.l. All rights reserved. No part of this document may be reproduced, published, used, disclosed or disseminated in any form or by any means, electronic, photocopying or otherwise, without prior written permission of ELAD S.r.l.

13 – Key/Paddle connector

3.5mm stereo jack connector.



The menu 37 (CW IN) allows to choose the input type (key or paddle).

The menu 39 (CW KEY) lets you choose the type of connection made when you use a key (i.e., connection on the TIP or on the RING).

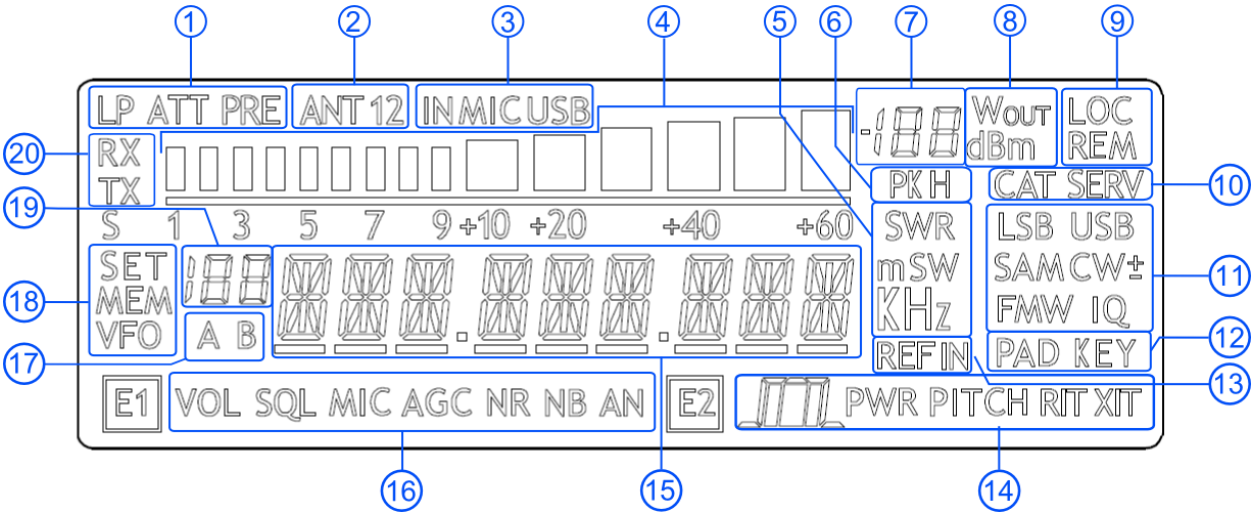
The menu 40 (CW TIP) lets you choose the type of connection made when using a paddle (i.e., position of the dot and the dash on the TIP or on the RING).

14 – Ground Connector

For better performance and safety, connect it to an earth ground using a short and wide cable.

© 2020 ELAD S.r.l. All rights reserved. No part of this document may be reproduced, published, used, disclosed or disseminated in any form or by any means, electronic, photocopying or otherwise, without prior written permission of ELAD S.r.l.

3 LCD Display



1. LP: turns on when the low pass filter is active.
   ATT: turns on when the attenuator is active.
2. ANT 1 2: displays the number of antennas chosen.
3. IN MIC USB: displays the input selected for transmission in SSB, AM and FM modes. Microphone or USB TX connector.
4. METER: while receiving displays the signal strength in S-units, in transmission displays the output power.
5. Units of measurements of the values displayed. The “S” letter of SWR is also used to indicate that the “QuickStep” function is active.
6. PK: blinks if the ADC of reception is “overloaded”.
7. Secondary indication: while receiving displays the signal strength in dBm, in transmission displays the output power in watt.
8. Measurement unit for the secondary indication.
9. LOC: turns on when the Main Knob is locked.
   REM: turns on when the remote mode is active, turns off when the stand-alone mode is active.
10. CAT: turns on when a CAT command is received.
    SERV: turns on when the service mode is enabled.
11. Operating mode.
12. Input selection for CW mode.
13. Turns on when the external frequency reference is present.
14. E2 selected function.
    : reception filter setting.
    PWR: transmission power setting (while transmitting).
    PITCH: CW pitch frequency setting.
    RIT: RIT setting.
15. Alphanumeric characters to displaying messages and numeric values.

© 2020 ELAD S.r.l. All rights reserved. No part of this document may be reproduced, published, used, disclosed or disseminated in any form or by any means, electronic, photocopying or otherwise, without prior written permission of ELAD S.r.l.

16. E1 selected function.
    VOL: main volume setting,
    SQL: squelch setting (for FM mode),
    MIC: microphone gain (while transmitting),
    AGC: automatic gain control settings,
    NR: noise reduction setting,
    NB: noise blanker setting,
    AN: auto notch setting.
17. Displays the selected VFO, A or B.
18. MEM: turns on in memory mode.
    VFO: turns on in VFO mode.
    SET: turns on when the setting menu is shown.
    SET: turns on jointly to MEM when the VFO→MEM menu is active.
19. In memory mode, displays the selected memory index.
    When in the setting menu, displays the menu number.
    In split, displays “SP”.
20. RX: turns on when receiving.
    TX: turns on when transmitting.

4 Quick Start

These instructions are intended only for a quick guide, detailed instructions are given later in this manual.

4.1 First of all

To avoid having a forest of buttons and knobs as front panel, each control has different operating modes.
The buttons can be “short pressed” or “long pressed” to activate different functions. The different functions associated to each pressure are written in different colors just above the corresponding button. Each top white label is associated to the “short pressure” on the button, while the lower blue label is associated to the “long pressure”.

Example

swaps A and B VFOs if “short pressed”, and swaps VFO and Memory mode if “long pressed”.
The A/B label refers to the A/B VFO swap obtained with a “short pressure”.
The M label refers to the VFO/Memory mode swap obtained with a “long pressure”.

Long Pressure

A button is “long pressed” when it is kept pressed for more than 1 sec.
This value can be changed using menu 71 (Hold Time) as explained in section 5.9 - Settings Menus List.
Valid values can vary from 500 ms to 2500 ms.

The knobs can be pressed as well to control a different parameter.

Example

The E1 knob usually controls the audio volume, but if pressed once it controls the squelch value.

Tuning

The tuning knob can be pressed to change the tuning step or to enter the “Digit by digit tuning mode”.
The tuning knob operations are detailed in section 5.1.1.1 - Tuning.

© 2020 ELAD S.r.l. All rights reserved. No part of this document may be reproduced, published, used, disclosed or disseminated in any form or by any means, electronic, photocopying or otherwise, without prior written permission of ELAD S.r.l.

4.2 Reset

When first approaching a largely programmable device like FDM-DUO it is nearly unavoidable to mess some parameters with useless values. This is not a problem and should not prevent users from trying the different settings, since a “reset” command is available to bring back the device to the factory settings.

Reset

The reset procedure is quite simple:

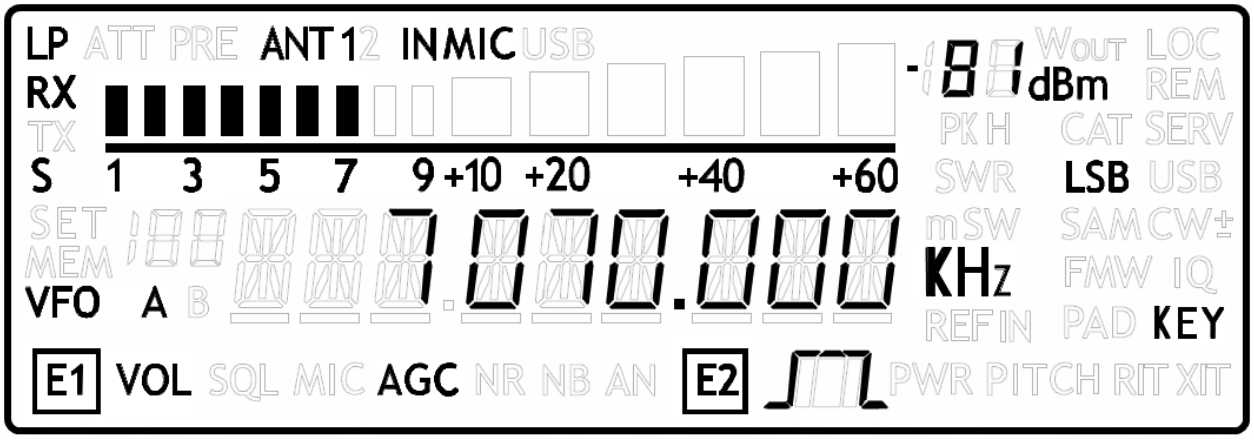
- short press the MENU button
- turn the F2 knob until reading 81 DEFAULT on the display
- short press the E2 knob to show “N” on the right of DEFAULT
- turn the E2 knob to change “N” to “Y”
- short press the E2 knob
- wait for the radio reset and restart

4.3 A first trip

A radio like FDM-DUO has many possible application scenarios, both used as a stand-alone device, and paired with its mate software.
In this section the simplest and most common uses will be shown, to allow a first familiarization with FDM-DUO.

4.3.1 Reception

The first use for FDM-DUO is, clearly, reception. To do that, just connect the device to a 12V power supply (or to a battery) and turn it on by using the back switch.



After some secs the device is in reception mode with VFO A enabled.

© 2020 ELAD S.r.l. All rights reserved. No part of this document may be reproduced, published, used, disclosed or disseminated in any form or by any means, electronic, photocopying or otherwise, without prior written permission of ELAD S.r.l.

The main controls are as follows:

Bands

FDM-DUO does not have the “band” concept, thus there is no “band switch”.
There are, though, some special memories holding the value of the low frequency limit of each band as factory settings.
The “Quick Mem” mode can be used to quickly reach the wanted band; it is activated by long pressing the V►M F1 button.

Press and hold the V►M F1 button until the display shows the wanted band.

Modes

The MODE F3 button is used to change to mode: at each short press the mode is changed to the next possible mode.

Tuning

The tuning is done using the main tuning knob.
It is possible to change the tuning step to an alternate value with a short pressure on the S F4 button.

Another short pressure on the S F4 button resets the usual tuning step.

It is possible to change the tuning step to various values with a short pressure on the tuning knob. This leads the tuning knob to select different tuning steps.

Once the desired step has been selected, another short pressure on the tuning knob will bring it back to control the tuning, using the new selected step.

Volume and bandwidth

The volume is set by the E1 knob.

The E2 knob controls the bandwidth.

© 2020 ELAD S.r.l. All rights reserved. No part of this document may be reproduced, published, used, disclosed or disseminated in any form or by any means, electronic, photocopying or otherwise, without prior written permission of ELAD S.r.l.

Enhancing Reception

By clicking on the E1 knob, it is possible to activate some useful options:

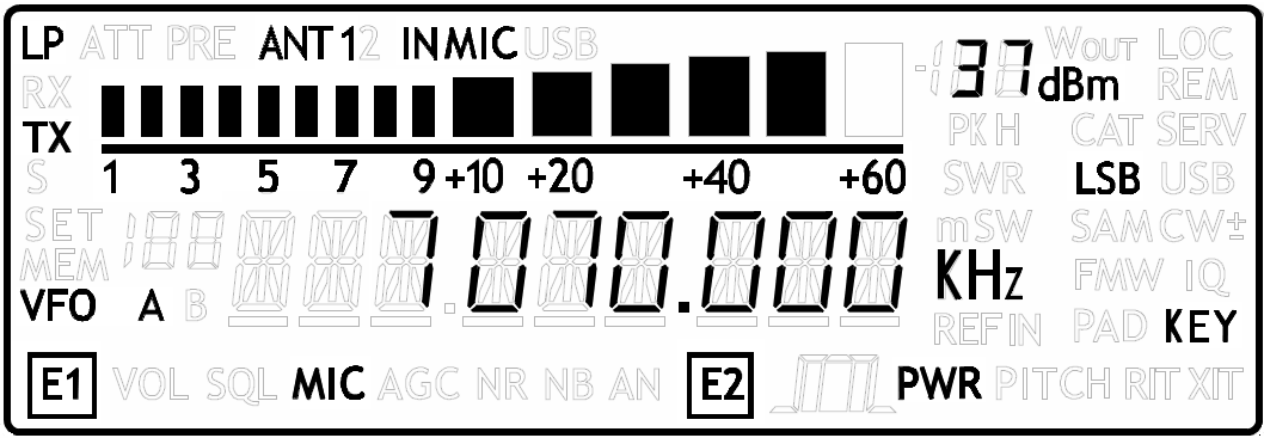
1. Audio Volume: this, as seen previously, is the default behavior;
2. Squelch Value: if activated, the related icon on the display blinks;
3. Automatic Gain Control On/Off: if activated, the AGC icon on the display blinks;
4. Automatic Gain Control Speed: it is possible to select Slow, Medium, or Fast;
5. Noise Reduction: it is possible to activate and set the level, if activated the NR icon on the display blinks;
6. Noise Blanker: it is possible to activate and set the level, if activated the NB icon on the display blinks;
7. Auto Notch: it is possible to activate and select two different levels of intervention; when activated, Auto Notch detects and kills an audio persistent tone.

By clicking on the E2 knob, it is possible to activate some useful options:

1. Filter Bandwidth: this, as seen previously, is the default behavior;
2. CW Pitch: this allows to choose the preferred CW reception tone;
3. Receive Incremental Tuning On/Off;
4. Receive Incremental Tuning Value: this allows to move the reception frequency away from the transmission frequency; this function appears only if the previous Receive Incremental Tuning is set to On. More information can be found in section 5.1.1.3 - E2 Receiver Settings.

© 2020 ELAD S.r.l. All rights reserved. No part of this document may be reproduced, published, used, disclosed or disseminated in any form or by any means, electronic, photocopying or otherwise, without prior written permission of ELAD S.r.l.

4.3.2 Transmission



Before transmitting, always check the antenna conditions, so as to avoid problems to the PA; this must be done on a free frequency to avoid disturbing any running QSOs.

Transmission

When FDM-DUO is transmitting, the display changes its backlight.

Using the parameter 73 – "BACKLIGHT CHANGING" it is possible to disable this change if it is deemed annoying, for example when operating in CW Break In mode.

Transmission in AM, SSB and FM Mode

To transmit you just have to use the PTT on the mike and speak.

In case of need it is possible to use the E1 knob to control the "Mic Gain": a short pressure on the E1 knob lets you control the Mic Gain instead of Volume, and vice versa.

Transmission in CW

Transmission is driven by the CW key.
The E1 knob controls the Volume or the CW speed (in WPM). The two functions can be swapped with a short press on the E1 knob.

© 2020 ELAD S.r.l. All rights reserved. No part of this document may be reproduced, published, used, disclosed or disseminated in any form or by any means, electronic, photocopying or otherwise, without prior written permission of ELAD S.r.l.

Antenna Tuning

Due to the importance of the antenna tuning, FDM-DUO is capable to generate the signal that allows antenna tuning.

This can be done with a long pressure on the

button.

The transmission will end after a time period established by parameter 49 - “TUNE TIME” (factory set to 10 secs) or by a new long pressure on

button.

During the transmission it is possible to show different information: pressing E2 knob it is possible to show frequency or forward power, or reflected power, or Standing Wave Ratio.

During the transmission it is possible to tune the antenna, if needed using an external ATU.

The tuning operations could be refined using parameters 55 – “TUNE POWER” and 56 – “TUNE PTT”.

Parameter 55 – “TUNE POWER” allows to select the power to be used when in tune mode, for example reducing the power as a means to protect final power transistors when not sure of the antenna conditions.

Parameter 56 – “TUNE PTT” allows to deactivate an external PA during tuning operations, by disabling the PTT Out signal during tuning operations.

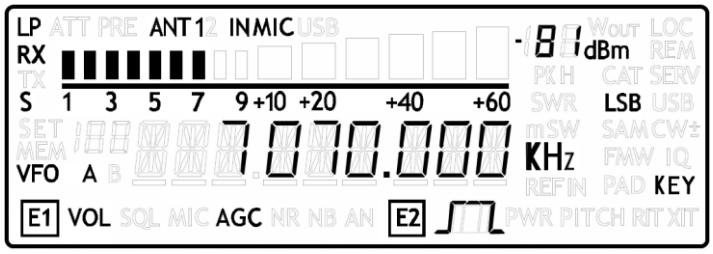
5 User Interface

5.1 VFO Mode

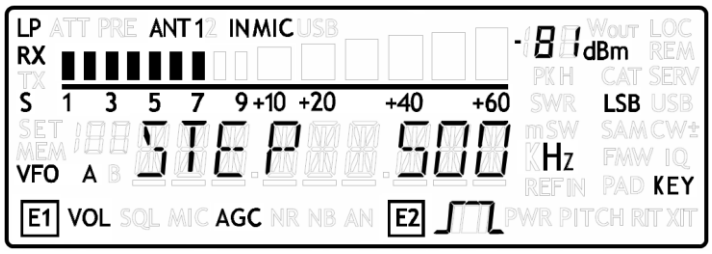
5.1.1 Receive

The VFO mode is the default mode of FDM-DUO. Each VFO memorize the tuning frequency, mode and tuning step



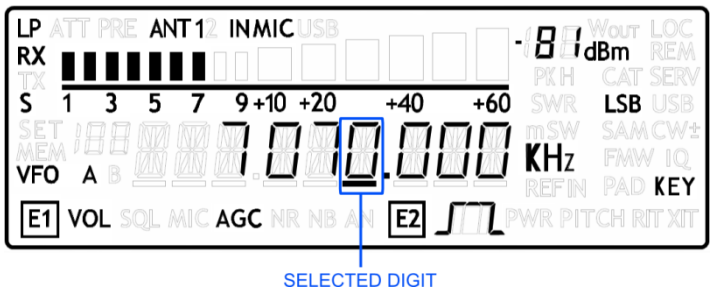
5.1.1.1 *Tuning*

In this mode, use the Main Knob to tune a frequency.
A short pressure on the main knob enter the frequency step menu



Use the main knob to modify the tuning step, then with a short pressure return in the VFO menu.

With a long pressure over the main knob, the Digit by Digit Frequency tuning mode is activated

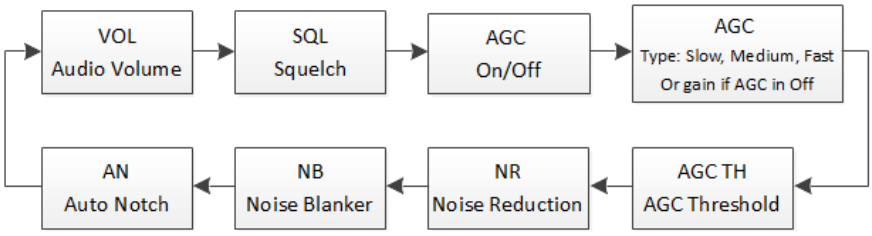


In this mode use the main knob to modify the selected digit and E1 or E2 to change witch digit you want to modify. Apply a short pressure on main knob to return in the standard tuning mode.

© 2020 ELAD S.r.l. All rights reserved. No part of this document may be reproduced, published, used, disclosed or disseminated in any form or by any means, electronic, photocopying or otherwise, without prior written permission of ELAD S.r.l.

5.1.1.2 *E1 Receiver Settings*

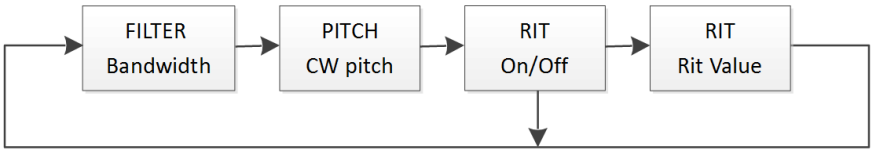
Apply a short pressure on the E1 knob to change the E1 selected parameter, the selected parameter icon is turned on in the LCD. Turn until one click the E1 knob to display the parameter value, then turn again E1 to modify the parameter value.



SQL: if the Squelch is turned on the relative SQL icon blinks.
AGC: if the AGC is turned OFF (manual gain mode), the AGC icon blinks.
NR and NB: if the Noise Reducer or the Noise Blanker is turned on the relative NR or NB icon blinks.

5.1.1.3 *E2 Receiver Settings*

Apply a short pressure on the E2 knob to change the E2 selected parameter, turn until one click the E2 knob to display the parameter value, then turn again E2 to modify the parameter value.



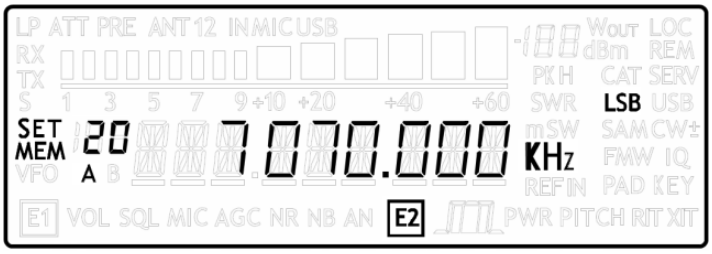
RIT: if the RIT is turned on the relative RIT icon blinks, note that if the RIT is turned off the "Rit Value" menu is not displayed. To modify the RIT value you have to use the E2 knob to change the selected digit and press the S F4 key to change the digit selection. Keep press the S F4 key to reset the RIT value.

5.1.1.4 *Switch VFO*

Use the A/B M button to switch VFO-A/B.

5.1.1.5 *Store VFO to Memory*

Use the V►M F1 key to store the current VFO settings into a memory



Use E2 knob or main knob to select the destination memory and confirm with a short pressure on E2.

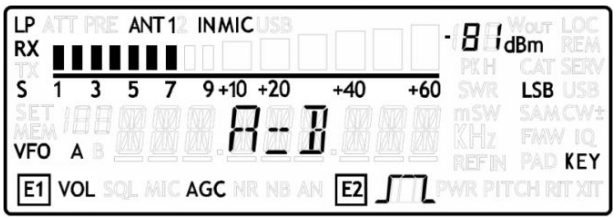
© 2020 ELAD S.r.l. All rights reserved. No part of this document may be reproduced, published, used, disclosed or disseminated in any form or by any means, electronic, photocopying or otherwise, without prior written permission of ELAD S.r.l.

5.1.1.6 *"QuickMem"* Mode

Keep pressed the V►M F1 key to enter the "QuickMem" mode.
The memory channels 180 to 199 are reserved for the "QuickMem" selection. Keep pressed the V►M F1 key until the desired frequency appears on the LCD display, then release the key and the current VFO is set to the frequency and mode saved in the memory channel.
You can use the "FDM-DUO Manager" feature in the ELAD FDM-SW2 software to customize the memory channels.

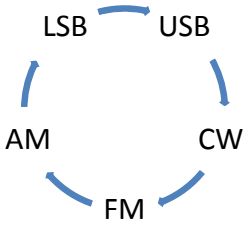
5.1.1.7 *VFO-A = VFO-B*

With long pressure on M►V F2 key you get VFO-A = VFO-B



5.1.1.8 *Change Operating Mode*

With a short pressure on the MODE F3 button, you can change the receiver mode between the available modes:



When you do not use the FM mode, you can disable it with the setting menu 14 "FM MODE". The main purpose of this functionality is to not hear the FM exasperating noise when changing between modes and you are not using the FM mode.

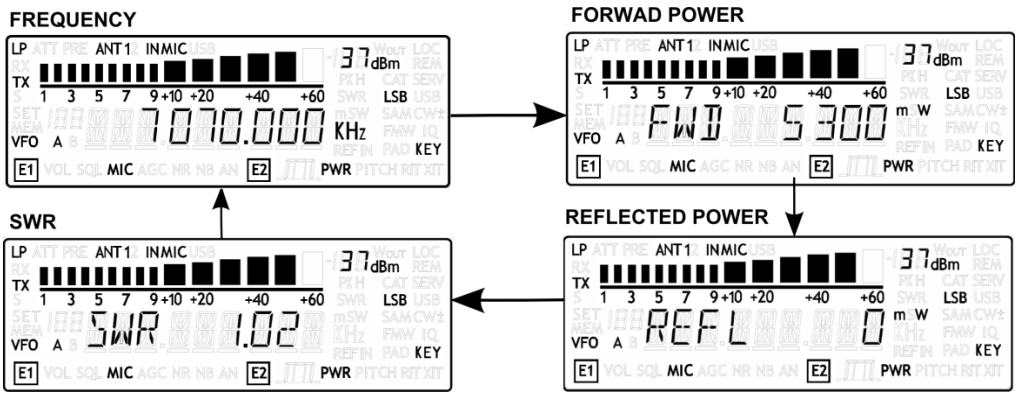
5.1.1.9 *"QuickStep"*

With a short pressure on the S F4 key, the "QuickStep" function is activated. This function quickly sets the frequency step preset selected in the "QuickStep" setting menu, press again the S F4 key to set the previous frequency step.

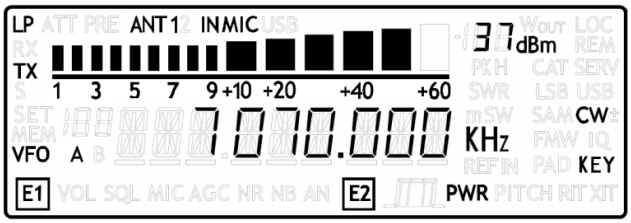
© 2020 ELAD S.r.l. All rights reserved. No part of this document may be reproduced, published, used, disclosed or disseminated in any form or by any means, electronic, photocopying or otherwise, without prior written permission of ELAD S.r.l.

5.1.2 Transmit

During the transmission some operations like tuning, VFO selection, mode selection are locked. With a short pressure on the E2 knob it is possible to change witch parameter is shown in the main display.



5.1.2.1 *Transmission in CW Mode*

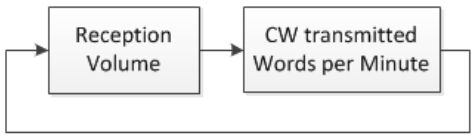


- CW Message

To begin transmit the CW message selected in the “CW message” menu (number 46), keep pressed the microphone PTT and apply a short pressure on the CW key or paddle. Push the PTT to stop the CW message transmission.
With a long pressure on S F4 or MENU F5 if the function has been activated in the “F4 Function” menu or in the “F5 Function” menu, the selected CW message is transmitted. Press the S F4 or MENU F5 to stop the CW message transmission.

- E1 transmitter settings

Turn until one click the E1 knob to display the parameter value, then turn again E1 to modify the parameter value. Apply a short pressure on the E1 knob to modify the parameter selection : “Reception Volume” or “CW Words Per Minute”.

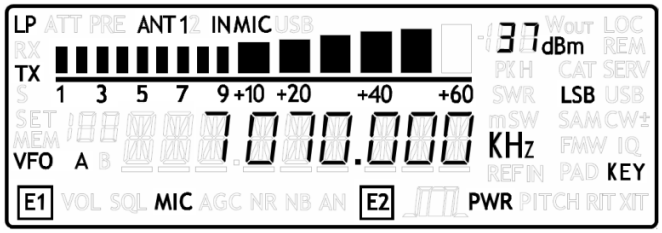


- E2 transmitter setting

Use E2 to change the transmission power.

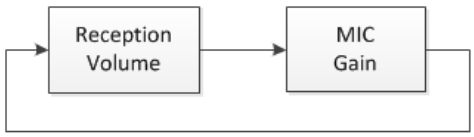
© 2020 ELAD S.r.l. All rights reserved. No part of this document may be reproduced, published, used, disclosed or disseminated in any form or by any means, electronic, photocopying or otherwise, without prior written permission of ELAD S.r.l.

5.1.2.2 *Transmission in AM, SSB and FM Modes*



- E1 transmitter settings

Turn until one click the E1 knob to display the parameter value, then turn again E1 to modify the parameter value. Apply a short pressure on the E1 knob to modify the parameter selection : "Reception Volume" or "Microphone Gain".



- E2 transmitter setting

Use E2 to change the transmission power.

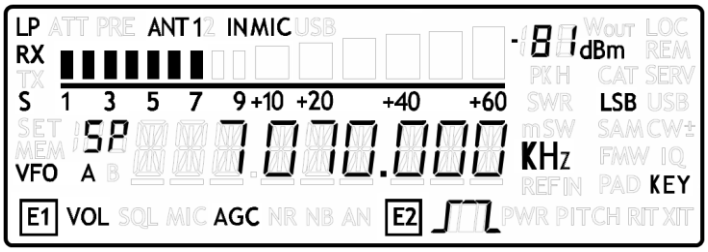
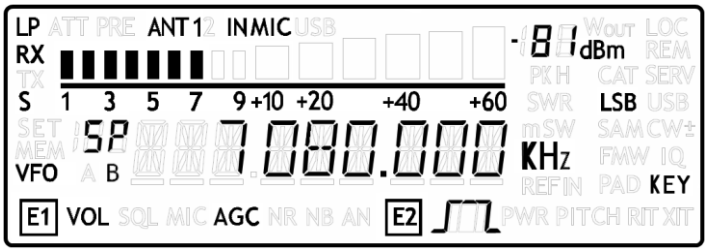
5.2 Split Functionality

Usually you can communicate with other stations using a single frequency for receiving and transmitting. In this case, you select only one frequency on either VFO-A or VFO-B. However, there are cases where you must select one frequency for receiving and a different frequency for transmitting. This requires the use of 2 VFOs. This is referred to as “Split”.
To activate the Split, select the “Split” option in the F4 or the F5 settings menu, then apply a long pressure on F4 or F5.

In Split the VFO-A is used to receive



The transmission frequency is set to the VFO-B frequency



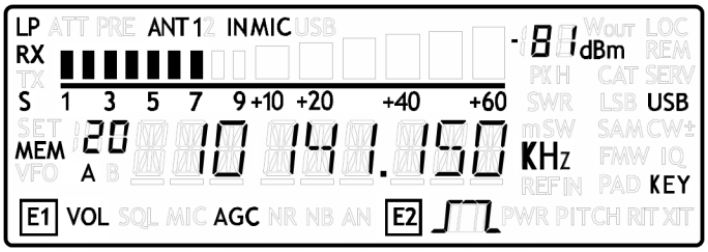
Notes :

- when the split functionality is activated the "SP" letters appear above the letter of the VFO (A or B),
- the split functionality is not available in MEM mode,
- when the split functionality is activated with the F4/F5 keys it is called stand-alone split, when the split functionality is activated by the FDM-SW2 software it is called remote split,
- when the remote split is active you can change the mode and frequency of the VFO-B only with the FDM-SW2 software, these parameters are then not settable from the FDM-DUO front panel.

© 2020 ELAD S.r.l. All rights reserved. No part of this document may be reproduced, published, used, disclosed or disseminated in any form or by any means, electronic, photocopying or otherwise, without prior written permission of ELAD S.r.l.

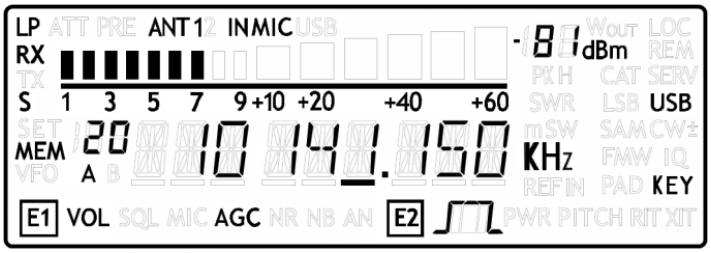
5.3 MEM Mode

To activate the memory mode, apply a long pressure on A/B M. In MEM mode it is possible to receive, transmit and change the E1/E2 settings in the same way of the VFO mode.



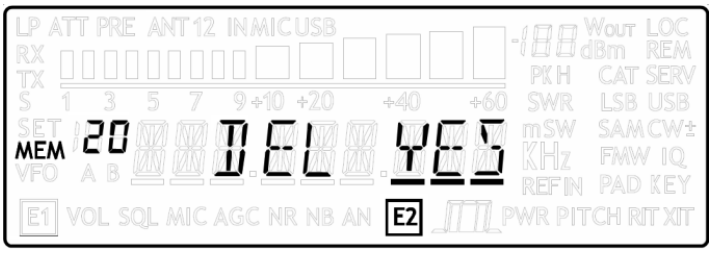
5.3.1 Select and edit a memory

Use the main knob to select a memory. Apply a long pressure on the main encoder to enter the edit memory menu. In this menu it is possible to modify the selected memory frequency in digit by digit mode.



5.3.2 Delete a memory

Apply a long pressure to the V►M F1 key to enter the delete menu.



Use the E2 knob to set yes or no and make a short pressure on E2 to confirm.

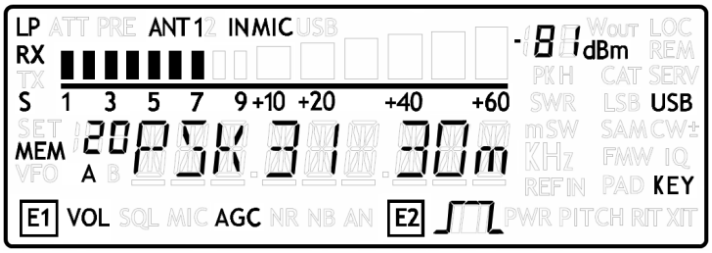
5.3.3 Set memory to VFO

Use the A/B M button to select the VFO-A/B. Use the M►V F2 key to set in the selected VFO the selected memory frequency and mode. When this function is used, the FDM-DUO automatically switches to the VFO mode.

© 2020 ELAD S.r.l. All rights reserved. No part of this document may be reproduced, published, used, disclosed or disseminated in any form or by any means, electronic, photocopying or otherwise, without prior written permission of ELAD S.r.l.

5.3.4 Change the memory display mode

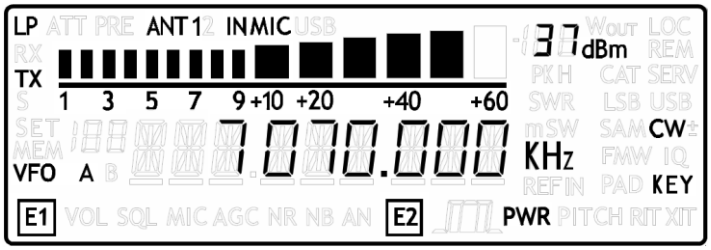
Apply a short pressure on the S F4 key to show the memory label in the LCD main display. Press shortly again S F4 to return to display the memory frequency.



You can use the “FDM-DUO Manager” feature in the ELAD FDM-SW2 software to customize the memory channels.

5.4 Antenna Tuning Mode

In VFO or MEM mode, apply a long pressure on MODE F3 key to switch to the Antenna Tuning Mode



In this mode a tone at the transmission frequency is generated. Use E2 to modify the transmission power.

The antenna tuning mode have a default timeout of 10s, this value can be modified in the settings menu 49 “TUNE TIME”. However you can apply a long pressure on MODE F3 key to exit from the antenna tuning mode.

Note:
the timeout is not active if:

- the selected transmission output is set to 0dBm,
- the “SERVICE MODE” is active.

© 2020 ELAD S.r.l. All rights reserved. No part of this document may be reproduced, published, used, disclosed or disseminated in any form or by any means, electronic, photocopying or otherwise, without prior written permission of ELAD S.r.l.

5.5 Maximum settable frequency

The maximum settable frequency is 54MHz. However, you can unlock this limit for experimental purposes until 165MHz by setting the FDM-DUO as follows :

- low pass filter deactivated, menu 2 “RX LP” set to “OFF”,
- output in 0dBm, menu 33 “TX OUT” set to “0dBm”.

5.6 Knobs functions

The following table describes the knob functions for some user interface menu :

Menu	Action	Main Knob	E1 Knob	E2 Knob
VFO	Value modified	Change selected VFO frequency	Enter E1 selection parameter	Enter E2 selection parameter
	Short Pressure	Enter STEP menu	Change E1 selected parameter	Change E2 selected parameter
	Long Pressure	Switch to DIGIT by DIGIT tuning mode	(2)	(2)
STEP	Value modified	Change tuning step value		
	Short Pressure	Exit from STEP Menu		
	Long Pressure	Switch to DIGIT by DIGIT tuning mode	(2)	(2)
MEM	Value modified	Select next/previous memory	Enter E1 selection parameter	Enter E2 selection parameter
	Short Pressure		Change E1 selected parameter	Change E2 selected parameter
	Long Pressure	Switch to DIGIT by DIGIT tuning mode	(2)	(2)
E1 Selection: VOL - SQL - AGC - NR - NB	Value modified	Back to VFO or MEM menu	Modify E1 selected parameter value	Modify E2 selected parameter value
	Short Pressure	Back to VFO or MEM menu	Change E1 selected parameter	Change E2 selected parameter
	Long Press	Switch to DIGIT by DIGIT tuning mode	(2)	(2)
E2 Selection: FILTER - PITCH - RIT	Value modified	Back to VFO or MEM menu	Modify E1 selected parameter value	Modify E2 selected parameter value
	Short Pressure	Back to VFO or MEM menu	Change E1 selected parameter	Change E2 selected parameter
	Long Pressure	Switch to DIGIT by DIGIT tuning mode	(2)	(2)
VFO > MEM	Value modified	Change the destination memory		Change the destination memory
	Short Press			Save VFO in the selected memory
	Long Pressure		(2)	(2)

5.7 Keys functions

The following table describes the keys functions.

Mode	Pressure	A/B M	V►M F1	M►V F2	MODE F3	S F4	MENU F5
VFO	Short	Switch VFO	Enter VFO to MEM menu	-	Change operating mode	Enable/disable Quickstep function	Enter settings menu
VFO	Long	Switch to MEM mode	Enter "QuickMem" menu	VFO A = B	Enter/Exit antenna tuning mode	F4 Selected Function	F5 Selected Function
MEM	Short	Switch VFO	-	Selected memory to VFO	Change selected memory operating mode	Change memory display frequency/label	Enter settings menu
MEM	Long	Switch to VFO mode	Enter delete memory menu	-	Enter/Exit antenna tuning mode	F4 Selected Function	F5 Selected Function

5.8 Microphone Keys functions

The following table describes the microphone keys functions.

Mode	Pressure	UP UP Keep pressed	DOWN DOWN Keep pressed
VFO	Short	Tune up frequency of one step	Tune down frequency of one step
VFO	Keep pressed	After HOLDTIME tune up the frequency according with the acceleration	After HOLDTIME tune down the frequency according with the acceleration
MEM	Short	Selected memory to VFO	Selected memory to VFO
MEM	Keep pressed	Selected memory to VFO and after HOLDTIME tune up the frequency according with the acceleration	Selected memory to VFO and after HOLDTIME tune down the frequency according with the acceleration

5.9 Settings Menus List

The following table describes the FDM-DUO settings menus list. To enter the settings menu mode, press the MENU F5 key. Use E2 to select the menu, then apply a short pressure on E2 to display the current menu setting, if you want to change the setting use the E2 knob and confirm the setting with a short pressure on E2. In some menu you can also use the main knob to change the setting more quickly. To turn back or exit the menu just press MENU F5.

Menu	Title	Description	Available Settings	Default	Main Knob Use	Relative CAT Command
RECEPTION MENUS						
1	RX ATT	Receiver input attenuation.	OFF or ON	OFF	-	AT
2	RX LP	Receiver low pass filter status.	OFF or ON	ON	-	LP
3	SNAP	Round to step.	OFF or ON	ON	-	SA
4	AGC TH	AGC Threshold.	From 0 to 10	4	-	TH
6	AUX VOL	Auxiliary output volume.	From 0 to 100	50	-	VA
7	QUICKSTEP	Step selected for the "QuickStep" mode.	1Hz, 5Hz, 10Hz, 25Hz, 50Hz, 100Hz, 250Hz, 500Hz, 1kHz, 2kHz, 3kHz, 4.5kHz, 5kHz, 7.5kHz, 9kHz, 10kHz, 12.5kHz, 25kHz, 50kHz, 100kHz, 125kHz, 250kHz, 500kHz, 1MHz	1kHz	-	QS
8	CW MUTE	Sets the mute status during CW transmission.	OFF or ON	OFF	-	MT
9	xSB MUTE	Sets the mute status during AM, FM or SSB transmission.	OFF or ON	ON	-	MT
10	FILBYPASS	Sets the pre-selection filters bypass, available only in reception in remote/mixed mode and in split.	OFF or ON	OFF	-	BP
11	TONE VOL	Sidetone volume.	From 0 to 100	5	-	VT
12	SET CW MODE	Enables/disables the CW reverse mode.	YES or NO	NO	-	MD
14	FM MODE	Enable / disable FM mode.	OFF or ON	ON	-	FM

Menu	Title	Description	Available Settings	Default	Main Knob Use	Relative CAT Command
15	RIT STEP	Step value for managing the RIT. If the value set is “none” the old operation mode is used (without step but digit by digit), if the value set is in Hz, the new operation mode is used (with step).	None, 1Hz, 5Hz, 10Hz, 25Hz, 50Hz, 100Hz, 250Hz, 500Hz, 1kHz	10Hz	-	RN
TRANSMISSION MENUS						
30	TX ENABLE	Enables the transmission.	OFF or ON	ON	-	TE
31	ANTENNAS	Number of antenna used.	1 or 2	1	-	AN
32	TX IN	Transmission input in AM, FM and SSB. The TXIN setting is automatically set to MIC if the PTT button is pressed or USB if the CAT command TX is received.	Microphone, USB soundcard, AUTO	Microphone	-	TI
33	TXOUT	Transmission output selection.	PWR (ant. RTX) or 0dBm (RFOUT)	PWR	-	TT
34	TX POWER	Transmission power selection.	0.1W to 5.0W in 0.1W steps or max available	5W	Yes	TP/TQ
35	TX BW	Transmission filter selection for FM, AM and SSB mode.	50Hz - 4000Hz 100Hz - 2700Hz 100Hz - 3000Hz 100Hz - 3500Hz 100Hz - 4000Hz 200Hz - 2700Hz 200Hz - 3000Hz 200Hz - 3500Hz 200Hz - 4000Hz 300Hz - 2700Hz 300Hz - 3000Hz 300Hz - 3500Hz 300Hz - 4000Hz	100Hz - 2700Hz	-	TB
36	MIC GAIN	Microphone Gain.	±12dB in step of 0.5dB	0dB	-	MG

© 2020 ELAD S.r.l. All rights reserved. No part of this document may be reproduced, published, used, disclosed or disseminated in any form or by any means, electronic, photocopying or otherwise, without prior written permission of ELAD S.r.l.

Menu	Title	Description	Available Settings	Default	Main Knob Use	Relative CAT Command
37	CW IN	CW transmission input selection. The Key+DTR option appears only when the USB is connected and is automatically disabled when the USB is disconnected, re-setting the selection to Key. This is done to avoid unwanted TX operations due to USB setup transient phases.	Key, Paddle, Key+DTR, Paddle+DTR	Key	-	CI
38	CW DELAY	PTT release delay in CW.	0 to 9000ms	240ms	Yes	CD
39	CW KEY	Selects where the key is connected on the key/paddle jack.	TIP or RING	TIP	-	KT
40	CW TIP	Selects the dot or dash on the tip of the key/paddle jack.	DOT or DASH	DASH	-	KT
41	CW IAMBIC	Sets the iambic mode.	A or B	A	-	IA
42	CW RX WPM	CW characters decoding speed.	5 to 90 words per minute	12	Yes	CS
43	CW RX TH	CW threshold for a tone recognition.	AUTO or from 1 to 10	AUTO	-	WT
44	CW DECODE	Enables/disables the automatic CW decoding.	OFF or ON	OFF	-	DE
45	CW TX WPM	CW transmission speed.	5 to 90 words per minute	10	Yes	CS
46	CW MSG	CW message selection.	Msg 1 to Msg 10	Msg 1	-	SW
47	TX VIEW	Selects the default parameter to be displayed during a transmission.	Frequency, forward power, reflected power, SWR	Forward power	-	TV
48	UP/DOWN ACC	MIC UP / DOWN acceleration of the microphone buttons.	1, 2, 3	2	-	UD
49	TUNE TIME	Antenna tuning mode timeout. Active only if the selected transmission output is the antenna. Not active in service mode.	3 to 120 seconds	10s	-	TU
50	ATT ON TX	Attenuation in transmission mode.	OFF or ON	OFF	-	AX
51	NOISE TH	Sets the noise gate threshold. Available only if TXIN is set to MIC.	OFF,1,2,... 10	2	-	NT
52	COMP GAIN	Sets dynamic compression gain. Available only if TXIN is set to MIC.	OFF,1,2,... 10	7	-	CG
53	TX FM DEV	Transmission FM deviation.	2.5kHz, 5kHz	2.5kHz	-	FD

Menu	Title	Description	Available Settings	Default	Main Knob Use	Relative CAT Command
54	PTT	PTT control.	PTT, PTT+RTS	PTT	-	TR
55	TUNE POWER	Sets the TUNE power.	0.3W, 0.5W, 1W, 1.2W, 1.5W, 2W, 3W, 4W, 5W or max available	5W	-	TL
56	TUNE PTT	Sets the PTT OUT behavior when in tune mode.	YES or NO	YES	-	PT
57	PTT DELAY	PTT OUT anticipation and delay in SSB, AM and FM.	0 to 1000ms	0ms	Yes	PD
58	PTT ON CW	Sets the microphone PTT key behavior when CW mode is selected.	CW message preparation, PTT out assertion	CW message preparation	-	TC
59	AUT CW TX	Sets the automatic CW transmission feature behavior.	Off, returns previous mode after transmission, stays in CW mode after transmission	Off	-	CK
GENERAL SETTINGS MENUS						
60	FR OFFSET	Enables/disables the frequency offset for the visualization.	OFF or ON	OFF	-	OS
61	OFS VALUE	Frequency offset value for the visualization.	+/- 99.999999999 GHz. See Frequency visualization offset menu	0Hz	Yes	OV/OW
62	F4	Selects the F4 key function when a long pressure is applied.	None / Send CW Message / Split / Main encoder tuning lock / Switch between CW and CWR	Send CW Message	-	FF
63	F5	Selects the F5 key function when a long pressure is applied.	None / Send CW Message / Split / Main encoder tuning lock / Switch between CW and CWR	Main encoder tuning lock	-	FF
70	CAT BAUD	CAT serial port baud rate.	9600, 38400, 57600, 115200	38400	-	BR
71	HOLD TIME	Hold time to detect a long pressure.	From 500 to 2500ms	1000ms	-	HT
72	REPT TIME	Repetition time when a key is pressed.	From 100 to 1500ms	600ms	-	ET

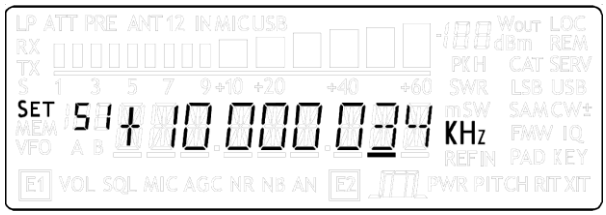
5.9.1 Frequency visualization offset menu

The frequency visualization offset is helpful when using a transverter. The Frequency offset is set in digit by digit mode with some improvements to set a signed 10 digit offset in a 9 digit display.

- E2: Select the digit to modify
- Main encoder: modify the selected digit value
- E1: change the visualization
  - kHz: the 8 most significant digit of the frequency offset are displayed
  - Hz: the 9 least significant digit of the frequency offset are displayed
- E1 or Main encoder short pressure: change the sign of the offset (+/-)
- E2 short pressure: save the setting

EXAMPLES:
Frequency offset value: +10,000,034,120 Hz

- kHz Display mode



- Hz Display mode

5.10 Transmission source

The transmission source in AM, FM and SSB modes depends on the TX IN setting (menu 32) and on what does the user. The table below shows the different possibilities.

User action	Source		
	TX IN = MIC	**TX IN = USB**	**TX IN = AUTO**
PTT push on microphone	Microphone	TX USB port	Microphone
TX CAT command sending	Microphone	TX USB port	TX USB port
RTS signal assertion*	Microphone	TX USB port	TX USB port

* to use RTS as PTT, enable the functionality in the PTT menu (number 54).

6 CAT Remote Control

6.1 General Specifications

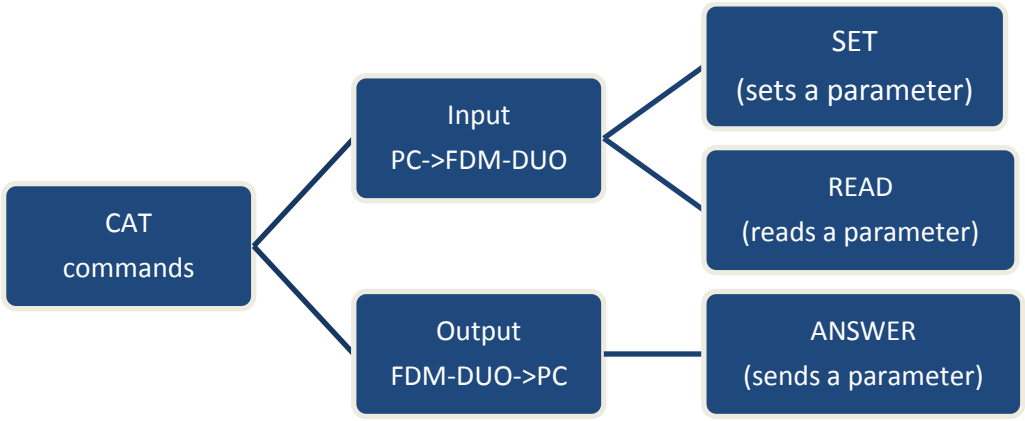
The FDM-DUO transceiver uses a full-duplex, asynchronous, USB serial interface for communicating through the USB CAT port. Each data is constructed with 1 start bit, 8 data bits, 1 stop bit, no parity is used (8N1). The baud rate is selectable in the [70] CAT BAUD menu. Available values are 9600, 38400, 57600, 115200 bps.
The FDM-DUO implements proprietary commands and also a subset of the Kenwood TS-480 command set. Some of those TS-480 commands have no effect on the transceiver, they only ensure the compatibility of the FDM-DUO with Ham Radio Deluxe.

6.2 Commands Types

A CAT command is composed of an alphabetical part, various parameters and a terminator that signals the end of the command. For example to set the VFO-A to 14MHz the command is: “FA00014000000;” with :

- “FA”: alphabetical command,
- “00014000000”: parameter,
- “;”: terminator.

CAT commands can be classified as shown below:



EXAMPLE

- To set the VFO-A to 14MHz the PC sends the **SET command type** “FA00014000000;”
- To read the VFO-A frequency the PC sends the **READ command type** “FA;”, the **ANSWER response type** is returned to the PC: “FA00014000000;”.

NOTE
Some particular rules about the CAT commands on the FDM-DUO :

- not all the commands have the three types of command/response (**SET**, **READ** and **ANSWER**),
- normally, send the **SET command type** will not cause the FDM-DUO to send the **ANSWER response type** but if a command does not have a **READ command type** and has the **SET and ANSWER type**, then send the **SET command** will cause the FDM-DUO to send the **ANSWER response type**.

6.3.2 Commands tables

AC	Reads the tune mode status										Parameters: P1: always '0' P2: always '0' P3 : '0': not active '1': active
Set											
Read	1	2	3	4	5	6	7	8	9	10	
	A	C	;								
Answer	1	2	3	4	5	6	7	8	9	10	
	A	C	P1	P2	P3	;					

AN	Reads or selects the number of antennas used										Parameters: P1: '1': only one antenna '2': two antennas, one for reception and another one for transmission
Set	1	2	3	4	5	6	7	8	9	10	
	A	N	P1	;							
Read	1	2	3	4	5	6	7	8	9	10	
	A	N	;								
Answer	1	2	3	4	5	6	7	8	9	10	
	A	N	P1	;							

AT	Reads or sets the input attenuator status										Parameters: P1 : '0' : not active '1' : active
Set	1	2	3	4	5	6	7	8	9	10	
	A	T	P1	;							
Read	1	2	3	4	5	6	7	8	9	10	
	A	T	;								
Answer	1	2	3	4	5	6	7	8	9	10	
	A	T	P1	;							

AX	Reads or sets the attenuator status during transmission										Parameters: P1 : '0' : not active '1' : active
Set	1	2	3	4	5	6	7	8	9	10	
	A	X	P1	;							
Read	1	2	3	4	5	6	7	8	9	10	
	A	X	;								
Answer	1	2	3	4	5	6	7	8	9	10	
	A	X	P1	;							

BH	Enables or disables the backlight change when moving between modes (Rx Stand Alone, Rx Remote, Tx Stand Alone, Tx Remote) *Set* not available during transmission										Parameters: P1 : '0' : off '1' : on
Set	1	2	3	4	5	6	7	8	9	10	
	B	H	P1	;							
Read	1	2	3	4	5	6	7	8	9	10	
	B	H	;								
Answer	1	2	3	4	5	6	7	8	9	10	
	B	H	P1	;

BP	**Enables or disables the pre-selection filters bypass** *Set* not available during transmission										Parameters: P1 : '0' : off '1' : on
Set	1	2	3	4	5	6	7	8	9	10	
	B	P	P1	;							
Read	1	2	3	4	5	6	7	8	9	10	
	B	P	;								
Answer	1	2	3	4	5	6	7	8	9	10	
	B	P	P1	;							

BR	**Reads or sets the baud rate value**										Parameters: P1 : '0': 9600 '1': 38400 '2': 57600 '3': 115200
Set	1	2	3	4	5	6	7	8	9	10	
	B	R	P1	;							
Read	1	2	3	4	5	6	7	8	9	10	
	B	R	;								
Answer	1	2	3	4	5	6	7	8	9	10	
	B	R	P1	;							

CD	**Reads or sets the CW delay value** *Set* not available during transmission										Parameters: P1 : 0 ~ 1000 (in ms)
Set	1	2	3	4	5	6	7	8	9	10	
	C	D	P1	P1	P1	P1	;				
Read	1	2	3	4	5	6	7	8	9	10	
	C	D	;								
Answer	1	2	3	4	5	6	7	8	9	10	
	C	D	P1	P1	P1	P1	;				

CG	**Reads or sets the transmitter compression gain**										Parameters: P1: always '0' P2 : compression gain value "000" : OFF "001" ~ 010" : active
Set	1	2	3	4	5	6	7	8	9	10	
	C	G	P1	P2	P2	P2	;				
Read	1	2	3	4	5	6	7	8	9	10	
	C	G	P1	;							
Answer	1	2	3	4	5	6	7	8	9	10	
	C	G	P1	P2	P2	P2	;				

CI	**Reads/Sets CW input** *Set* not available during transmission *Set* possible with "+ DTR" only if : - USB CAT cable inserted, - DTR signal stable, - DTR signal at the idle level.										Parameters: P1 : '0' : key '1' : paddle '2': key + DTR '3': paddle + DTR
Set	1	2	3	4	5	6	7	8	9	10	
	C	I	P1	;							
Read	1	2	3	4	5	6	7	8	9	10	
	C	I	;								
Answer	1	2	3	4	5	6	7	8	9	10	
	C	I	P1	;

CK	**Sets or reads the status of the CW automatic transmission function** *Set* not available during transmission										Parameters: P1 : '0': off '1': on, returns in the previous set mode after the transmission '2': on, stays in CW mode after the transmission
Set	1	2	3	4	5	6	7	8	9	10	
	C	K	P1	;							
Read	1	2	3	4	5	6	7	8	9	10	
	C	K	;								
Answer	1	2	3	4	5	6	7	8	9	10	
	C	K	P1	;							

CM	**Reads or sets CW messages** *Set* not available during transmission See also CP and SW commands										Parameters: P1 : CW Message Index (0 To 9) P2 : CW Message text (ASCII)
Set	1	2	3	4	5	6	7	8	9	10	
	C	M	P1	P1	P2	P2	P2	P2	P2	P2	
	11	12	13	14	15	16	17	18	19	20	
	P2	P2	P2	P2	P2	P2	P2	P2	P2	P2	
	21	22	23	24	25	26	27	28	29	30	
	P2	P2	P2	P2	P2	P2	P2	P2	P2	P2	
	31	32	33	34	35	36	37				
	P2	P2	P2	P2	P2	P2	;				
Read	1	2	3	4	5	6	7	8	9	10	
	C	M	P1	P1	;						
Answer	1	2	3	4	5	6	7	8	9	10	
	C	M	P1	P1	P2	P2	P2	P2	P2	P2	
	11	12	13	14	15	16	17	18	19	20	
	P2	P2	P2	P2	P2	P2	P2	P2	P2	P2	
	21	22	23	24	25	26	27	28	29	30	
	P2	P2	P2	P2	P2	P2	P2	P2	P2	P2	
	31	32	33	34	35	36	37				
	P2	P2	P2	P2	P2	P2	;				

Allowed characters are:
ABCDEFGHIJKLMNOPQRSTUVW
XYZ ' '(space) 0123456789
! " & ' ( ) + , - . / : = ? @ _
A fixed length of 32 is used for P2, unused characters at the end of the message must be ' ' (space).

CP	**Reads or sets CW messages in a partial way** *Set* not available during transmission See also CM and SW commands										Parameters: P1 : part index (0 to 3) P2 : CW message index (0 to 9) P3 : part of CW message (ASCII)
Set	1	2	3	4	5	6	7	8	9	10	
	C	P	P1	P2	P2	P3	P3	P3	P3	P3	
	11	12	13	14	15	16	17	18	19	20

CS	**Reads or sets the CW speeds**										Parameters: P1: '0' : sets both speeds '1' : set only the decoding speed '2' : set only the transmission speed P2: decoding speed of CW characters (5 to 90 WPM) P3: transmission speed of CW characters (5 to 90 WPM)
Set	1	2	3	4	5	6	7	8	9	10	
	C	S	P1	P2	P2	P2	P3	P3	P3	;	
Read	1	2	3	4	5	6	7	8	9	10	
	C	S	;								
Answer	1	2	3	4	5	6	7	8	9	10	
	C	S	P2	P2	P2	P3	P3	P3	;		

DE	**Sets or reads the CW decode function status** See also WT command										Parameters: P1 : '0' : off '1' : on
Set	1	2	3	4	5	6	7	8	9	10	
	D	E	P1	;							
Read	1	2	3	4	5	6	7	8	9	10	
	D	E	;								
Answer	1	2	3	4	5	6	7	8	9	10	
	D	E	P1	;							

DF	**Sets the default value** *Set* not available during transmission										Parameters: P1 : always '1' P2 : "5214" P3 : result : '0' error '1' ok
Set	1	2	3	4	5	6	7	8	9	10	
	D	F	P1	P2	P2	P2	P2	;			
Read											
Answer	1	2	3	4	5	6	7	8	9	10	
	D	F	P3	;							

DT	**Reads the FDM-DUO type**										Parameters: P1 : always "001"
Set											
Read	1	2	3	4	5	6	7	8	9	10	
	D	T	;								
Answer	1	2	3	4	5	6	7	8	9	10	
	D	T	P1	P1	P1	;					

ET	**Reads or sets the repeat time setting**										Parameters: P1: repeat time, from 100ms to 1500ms in 100ms steps.
Set	1	2	3	4	5	6	7	8	9	10	
	E	T	P1	P1	P1	P1	;				
Read	1	2	3	4	5	6	7	8	9	10

Read	1	2	3	4	5	6	7	8	9	10	
	F	A	;								
Answer	1	2	3	4	5	6	7	8	9	10	
	F	A	P1	P1	P1	P1	P1	P1	P1	P1	
	11	12	13	14	15	16	17	18	19	20	
	P1	P1	P1	;							

FB	**Reads or sets the VFO B frequency** *Set* not available during power transmission										Parameters: P1 : frequency in Hz (11 digit)
Set	1	2	3	4	5	6	7	8	9	10	
	F	B	P1	P1	P1	P1	P1	P1	P1	P1	
	11	12	13	14	15	16	17	18	19	20	
	P1	P1	P1	;							
Read	1	2	3	4	5	6	7	8	9	10	
	F	B	;								
Answer	1	2	3	4	5	6	7	8	9	10	
	F	B	P1	P1	P1	P1	P1	P1	P1	P1	
	11	12	13	14	15	16	17	18	19	20	
	P1	P1	P1	;							

FD	**Reads or sets the FM deviation for the transmission** *Set* not available during transmission										Parameters: P1 : always 0 P2 : '0' : 2.5kHz '1' : 5kHz
Set	1	2	3	4	5	6	7	8	9	10	
	F	D	P1	P2	;						
Read	1	2	3	4	5	6	7	8	9	10	
	F	D	;								
Answer	1	2	3	4	5	6	7	8	9	10	
	F	D	P1	P2	;						

FF	**Reads or sets the F4 and F5 function settings** *Set* not available during transmission										Parameters: P1 : '4' : set F4 '5' : set F5 P2 : FX settings: "00": nothing "01": CW message transmission "02": on/off split "03": encoder block "04": CW change (normal/reverse)
Set	1	2	3	4	5	6	7	8	9	10	
	F	F	P1	P2	P2	;					
Read	1	2	3	4	5	6	7	8	9	10	
	F	F	P1	;							
Answer	1	2	3	4	5	6	7	8	9	10

FM	**Reads or sets the FM mode activation status**										Parameters: P1 : '0': FM mode not available '1': FM mode available
Set	1	2	3	4	5	6	7	8	9	10	
	F	M	P1	;							
Read	1	2	3	4	5	6	7	8	9	10	
	F	M	;								
Answer	1	2	3	4	5	6	7	8	9	10	
	F	M	P1	;							

FP	**Reads forward power**										Parameters: P1: ' '(blank) o '!' in case of an unreliable power value, i.e. : - DUO is in RX mode - DUO is in TX mode with 0dBm P2 : forward power
Set											
Read	1	2	3	4	5	6	7	8	9	10	
	F	P	;								
Answer	1	2	3	4	5	6	7	8	9	10	
	F	P	P1	P2	P2	P2	P2	P2	P2	;	

FR	**Reads or sets the VFO or M.CH mode** *Set* not available during transmission										Parameters: P1 : '0' : VFO-A '1' : VFO-B '2' : M.CH
Set	1	2	3	4	5	6	7	8	9	10	
	F	R	P1	;							
Read	1	2	3	4	5	6	7	8	9	10	
	F	R	;								
Answer	1	2	3	4	5	6	7	8	9	10	
	F	R	P1	;							

FT	**Reads or sets the VFO or M.CH mode** *Set* not available during transmission										Parameters: P1 : '0' : VFO-A '1' : VFO-B '2' : M.CH
Set	1	2	3	4	5	6	7	8	9	10	
	F	T	P1	;							
Read	1	2	3	4	5	6	7	8	9	10	
	F	T	;								
Answer	1	2	3	4	5	6	7	8	9	10	
	F	T	P1	;							

GC	**Reads or sets the active gain control** See also GS and TH commands										Parameters: P1 : '0' : auto (AGC) '1' : manual
Set	1	2	3	4	5	6	7	8	9	10	
	G	C	P1	;							
Read	1	2	3	4	5	6	7	8	9	10	
	G	C	;								
Answer	1	2	3	4	5	6	7	8	9	10	
	G	C	P1	;

	P7	P8	P8	P8	P8	;				

Parameters:
P1 : RIT status:
'0' : OFF
'1' : ON

P2 : always '0'

P3 : selected memory index (0-199)

P4 : Rx/Tx status
'0' : Rx
'1' : Normal Tx
'2' : Tune Tx

P5 : Current mode (See MD command)

P6 : Current VFO-MEM mode :
'0' : VFO-A
'1' : VFO-B
'2' : MEM

P7 : split status:
'0' : split off
'1' : stand-alone split on
'2' : remote split on

P8 : always "0000"

GS	**Reads or sets the control gain settings** See also GC and TH commands									
Set	*1*	*2*	*3*	*4*	*5*	*6*	*7*	*8*	*9*	*10*

	11	12	13	14	15	16	17	18	19	20
	P5	P5	;							

Parameters:
P1 : mode:
0 : temporary set
1 : Rx Stand Alone
2 : Rx Remote (PC Controlled)
3 : Tx Stand Alone (MIC input)
4 : Tx Remote (USB Audio)
5 : Tx Stand Alone CW

P2 : selezione modalità:
1 : Rx Stand Alone
2 : Rx Remote (PC Controlled)
3 : Tx Stand Alone (MIC Input)
4 : Tx Remote (USB Input)
5 : Tx Stand Alone CW

P3 : RED component (0 to 100)
P4 : GREEN component (0 to 100)
P5 : BLUE component (0 to 100)

LP	Sets/Reads the Low-Pass Filter Status									
Set	1	2	3	4	5	6	7	8	9	10
	L	P	P1	;						
Read	1	2	3	4	5	6	7	8	9	10

	P13	P13	P13	P13	P13	P13	P13	P13	P14	P14
	41	42	43	44	45	46	47	48	49	50
	P15	P16	P16	P16	P16	P16	P16	P16	P16	;

Parameters:
P1: 0
P2/P3: 0 to 199 Memory No.
P4: Frequency (11 digit)
P5: Mode (see MD command)
P6: Always 0
P7: Always 0
P8: Always 0
P9: Always 0
P10 to P13: Memory label, last 14 chars
P14: 0
P15: Memory status
B: used
F: free
P16: Memory label, first 8 chars

MT — Reads or sets the mutes status during transmission

Set not available during transmission

Set	1	2	3	4	5	6	7	8	9	10
	M	T	P1	P2	;					
Read	1	2	3	4	5	6	7	8	9	10
	M	T	;							
Answer	1	2	3	4	5	6	7	8	9	10
	M	T	P1	P2	;					

Parameters:
P1 : CW MUTE
'0' : not active
'1' : active

P2 : SSB MUTE
'0' : not active
'1' : active

MW — Store the data to the memory channel

Set	1	2	3	4	5	6	7	8	9	10
	M	W	P1	P2	P3	P3	P4	P4	P4	P4
	11	12	13	14	15	16	17	18	19	20
	P4	P4	P4	P4	P4	P4	P4	P5	P6	P7

	41	42	43	44	45	46	47	48	49	50
	P15	P16	P16	P16	P16	P16	P16	P16	P16	;
Read										
Answer										

Parameters:
P1: 0
P2/P3: 0 to 199 Memory No.
P4: Frequency (11 digit)
P5: Mode (see MD command)
P6: Always 0
P7: Always 0
P8: Always 0
P9: Always 0
P10 to P13: Memory label, last 14 chars
P14: 0
P15: Memory status
B: used
F: free
P16: Memory label, first 8 chars

NB — Reads the noise blanker function status

Set										
Read	1	2	3	4	5	6	7	8	9	10
	N	B	;							
Answer	1	2	3	4	5	6	7	8	9	10
	N	B	P1	;						

Parameters:
P1
'0' : Noise Blanker OFF
'1' : Noise Blanker ON

NC	Reads or sets the noise reduction value										Parameters: P1 : always 0 P2 : noise reduction value: 0 : OFF 1 ~ 10 : active
Set	1	2	3	4	5	6	7	8	9	10	
	N	C	P1	P2	P2	P2	;				
Read	1	2	3	4	5	6	7	8	9	10	
	N	C	P1	;							
Answer	1	2	3	4	5	6	7	8	9	10	
	N	C	P1	P2	P2	P2	;				

NK	Reads or sets the noise blanker value										Parameters: P1 : always '0' P2 : noise blanker value: 0 : OFF 1 ~ 10 : active
Set	1	2	3	4	5	6	7	8	9	10	
	N	K	P1	P2	P2	P2	;				
Read	1	2	3	4	5	6	7	8	9	10	
	N	K	P1	;							
Answer	1	2	3	4	5	6	7	8	9	10	
	N	K	P1	P2	P2	P2	;				

NO	Reads or sets the auto notch value										Parameters: P1 : always '0' P2 : auto notch value: 0 : OFF 1 ~ 2 : active
Set	1	2	3	4	5	6	7	8	9	10	
	N	O	P1	P2	P2	P2	;				
Read	1	2	3	4	5	6	7	8	9	10	
	N	O	P1	;							
Answer	1	2	3	4	5	6	7	8	9	10	
	N	O	P1	P2	P2	P2	;				

NR	Reads the noise reduction function status										Parameters: P1: '0' : Noise Reduction OFF '1' : Noise Reduction ON
Set											
Read	1	2	3	4	5	6	7	8	9	10	
	N	R	;								
Answer	1	2	3	4	5	6	7	8	9	10	
	N	R	P1	;							

NT	Reads or sets the transmitter noise threshold										Parameters: P1 : always '0' P2 : noise threshold value 0 : OFF 1 ~ 10 : active
Set	1	2	3	4	5	6	7	8	9	10	
	N	T	P1	P2	P2	P2	;				
Read	1	2	3	4	5	6	7	8	9	10	
	N	T	P1	;							
Answer	1	2	3	4	5	6	7	8	9	10	
	N	T	P1	P2	P2	P2	;				

OS	Reads or sets the Frequency view offset status *Set* not available during transmission See also OV and OW commands										Parameters: P1 : '0' : not active '1' : active
Set	1	2	3	4	5	6	7	8	9	10	
	O	S	P1	;							
Read	1	2	3	4	5	6	7	8	9	10	
	O	S	;								
Answer	1	2	3	4	5	6	7	8	9	10	
	O	S	P1	;

OV	**Reads or sets the Frequency view offset value** *Set* not available during transmission See also OS and OW commands									
Set	1	2	3	4	5	6	7	8	9	10
	O	V	P1	P2	P3	P3	P3	P3	P3	P3
	11	12	13	14	15	16	17	18	19	20
	P3	P3	P3	P3	P3	P3	P3	P3	P3	;
Read	1	2	3	4	5	6	7	8	9	10
	O	V	P1	;						
Answer	1	2	3	4	5	6	7	8	9	10
	O	V	P1	P2	P3	P3	P3	P3	P3	P3
	11	12	13	14	15	16	17	18	19	20
	P3	P3	P3	P3	P3	P3	P3	P3	P3	;

Parameters:
P1 : always '0'

P2 : offset sign'+' /'-'

P3 : absolute value in Hz

OW	**Sets/Reads the Frequency view offset value** See also OS and OV commands									
Set	1	2	3	4	5	6	7	8	9	10
	O	W	P1	P2	P2	P2	P2	P2	P2	P2
	11	12	13	14	15	16	17	18	19	20
	P2	P2	P2	P2	P2	;				
Read	1	2	3	4	5	6	7	8	9	10
	O	W	;							
Answer	1	2	3	4	5	6	7	8	9	10
	O	W	P1	P2	P2	P2	P2	P2	P2	P2
	11	12	13	14	15	16	17	18	19	20
	P2	P2	P2	P2	P2	;				

Parameters:
P1 : offset sign'+' /'-'

P2 : absolute value in Hz

PD	**Reads or sets the PTT delay value** *Set* not available during transmission									
Set	1	2	3	4	5	6	7	8	9	10
	P	D	P1	P1	P1	P1	;			
Read	1	2	3	4	5	6	7	8	9	10
	P	D	;							
Answer	1	2	3	4	5	6	7	8	9	10
	P	D	P1	P1	P1	P1	;			

Parameters:
P1 : PTT delay value in ms:
"0000" ~ "1000"

PI	**Reads or sets the pitch value**									
Set	1	2	3	4	5	6	7	8	9	10
	P	I	P1	P1	P1	P1	;			
Read	1	2	3	4	5	6	7	8	9	10
	P	I	;							
Answer	1	2	3	4	5	6	7	8	9	10
	P	I	P1	P1	P1	P1	;			

Parameters:
P1: pitch value in Hz:
"0000" ~ "1000" in 10Hz step

PT	**Reads or sets the PTT OUT in tune status** *Set* not allowed when in Tx										Parameters: P1 : "00": OFF "01": ON
Set	1	2	3	4	5	6	7	8	9	10	
	P	T	P1	P1	;						
Read	1	2	3	4	5	6	7	8	9	10	
	P	T	;								
Answer	1	2	3	4	5	6	7	8	9	10	
	P	T	P1	P1	;						

QS	**Sets or reads the quick step index**										Parameters: P1: quickstep index Steps list (in Hz): 1, 5, 10, 25, 50, 100, 250, 500, 1000, 2000, 3000, 4500, 5000, 7500, 9000, 10k, 12.5k, 25k, 50k, 100k, 125k, 250k, 500k, 1M.
Set	1	2	3	4	5	6	7	8	9	10	
	Q	S	P1	P1	;						
Read	1	2	3	4	5	6	7	8	9	10	
	Q	S	;								
Answer	1	2	3	4	5	6	7	8	9	10	
	Q	S	P1	P1	;						

RA	**Reads or sets the attenuator function status**										Parameters: P1 : "00": ATT OFF "01": ATT ON P2 : always "00"
Set	1	2	3	4	5	6	7	8	9	10	
	R	A	P1	P1	;						
Read	1	2	3	4	5	6	7	8	9	10	
	R	A	;								
Answer	1	2	3	4	5	6	7	8	9	10	
	R	A	P1	P1	P2	P2	;				

RC	**Clears the RIT value**										Parameters: None
Set	1	2	3	4	5	6	7	8	9	10	
	R	C	;								
Read											
Answer											

RD	**Sets RIT to a negative value**										Parameters: P1 : negative value of RIT to set (from 0 to 50000Hz, max value subject to change) P2 : always '1'
Set	1	2	3	4	5	6	7	8	9	10	
	R	D	P1	P1	P1	P1	P1	;			
Read	1	2	3	4	5	6	7	8	9	10	
	R	D	;								
Answer	1	2	3	4	5	6	7	8	9	10	
	R	D	P2	;

RN	Reads or sets the RIT step index										Parameters: P1: RIT step index '0': none '1': 1Hz '2': 5Hz '3': 10Hz '4': 25Hz '5': 50Hz '6': 100Hz '7': 250Hz '8': 500Hz '9': 1000Hz
Set	1	2	3	4	5	6	7	8	9	10	
	R	N	P1	;							
Read	1	2	3	4	5	6	7	8	9	10	
	R	N	;								
Answer	1	2	3	4	5	6	7	8	9	10	
	R	N	P1	;							

RP	Reads reflected power										Parameters: P1: ' '(blank) o '!' in case of an unreliable power value, i.e. : - DUO is in RX mode - DUO is in TX mode with 0dBm P2 : reflected power
Set											
Read	1	2	3	4	5	6	7	8	9	10	
	R	P	;								
Answer	1	2	3	4	5	6	7	8	9	10	
	R	P	P1	P2	P2	P2	P2	P2	P2	;	

RT	Reads or sets the RIT function status										Parameters: P1: '0' : RIT function OFF '1' : RIT function ON
Set	1	2	3	4	5	6	7	8	9	10	
	R	T	P1	;							
Read	1	2	3	4	5	6	7	8	9	10	
	R	T	;								
Answer	1	2	3	4	5	6	7	8	9	10	
	R	T	P1	;							

RU	Sets RIT to a positive value										Parameters: P1: ositive value of RIT to set (from 0 to 50000Hz, max value subject to change) P2: always '1'
Set	1	2	3	4	5	6	7	8	9	10	
	R	U	P1	P1	P1	P1	P1	;			
Read	1	2	3	4	5	6	7	8	9	10	
	R	U	;								
Answer	1	2	3	4	5	6	7	8	9	10	
	R	U	P2	;							

RV	Reads or sets the RIT value										Parameters: P1: '+': positive o null value '-': negative value P2: absolute value of RIT to set (from 0 to 50000Hz, max value subject to change)
Set	1	2	3	4	5	6	7	8	9	10	
	R	V	P1	P2	P2	P2	P2	P2	P2	;	
Read	1	2	3	4	5	6	7	8	9	10

RX	Sets the transceiver in RX mode See also TX command										Parameters: P1: always '0'
Set	1	2	3	4	5	6	7	8	9	10	
	R	X	;								
Read											
Answer	1	2	3	4	5	6	7	8	9	10	
	R	X	P1	;							

SA	Reads or sets the Tune Snap status										Parameters: P1: snap status '0': OFF '1': ON
Set	1	2	3	4	5	6	7	8	9	10	
	S	A	P1	;							
Read	1	2	3	4	5	6	7	8	9	10	
	S	A	;								
Answer	1	2	3	4	5	6	7	8	9	10	
	S	A	P1	;							

SE	Reads or sets the service mode status *Set* not available during transmission										Parameters: P1: always '1', force the service mode P2: always '0', if in service mode this CAT protocol is not available
Set	1	2	3	4	5	6	7	8	9	10	
	S	E	P1	;							
Read	1	2	3	4	5	6	7	8	9	10	
	S	E	;								
Answer	1	2	3	4	5	6	7	8	9	10	
	S	E	P2	;							

SI	Sets or reads the selected VFO step index										Parameters: P1: step index Steps list (in Hz): 1, 5, 10, 25, 50, 100, 250, 500, 1000, 2000, 3000, 4500, 5000, 7500, 9000, 10k, 12.5k, 25k, 50k, 100k, 125k, 250k, 500k, 1M.
Set	1	2	3	4	5	6	7	8	9	10	
	S	I	P1	;							
Read	1	2	3	4	5	6	7	8	9	10	
	S	I	;								
Answer	1	2	3	4	5	6	7	8	9	10

Read	1	2	3	4	5	6	7	8	9	10
	S	F	P2	;						
Answer	1	2	3	4	5	6	7	8	9	10
	S	F	P1	P2	P3	P4	P4	P4	P4	P4
	11	12	13	14	15	16	17	18	19	20
	P4	P4	P4	P4	P4	P4	P5	P5	P5	P5
	21	22	23	24	25	26	27	28		
	P5	P5	P5	P5	P5	P5	P5	;		

Parameters:
P0: operation type
'F' : saves the filter settings with parameters P2 to P5
'N' : disables the SPF-08 management (P2 to P5 are not treated)
'Y' : enables the SPF-08 management(P2 to P5 are not treated)

P1: SPF-08 management status
'N' : management disabled
'Y' : management enabled

P2 : filter index, '0' ~ '7'

P3 : filter usage status,
'0' : not used
'1' : used

P4 filter low frequency

P5 filter high frequency

SM	Reads the S-meter status									
Set										
Read	1	2	3	4	5	6	7	8	9	10
	S	M	P1	;						
Answer	1	2	3	4	5	6	7	8	9	10
	S	M	P1	P2	P2	P2	P2	;		

Parameters:
P1: always '0'
P2: Meter Read
"0000": S0
"0002": S1
"0003": S2
"0004": S3
"0005": S4
"0006": S5
"0008": S6
"0009": S7
"0010": S8
"0011": S9
"0012": S9+10
"0014": S9+20
"0016": S9+30
"0018": S9+40
"0020": S9+50
"0022" : S9+60

SN	Reads the transceiver serial number									
Set										
Read	1	2	3	4	5	6	7	8	9	10
	S	N	;							
Answer	1	2	3	4	5	6	7	8	9	10
	S	N	P1	P1	P1	P1	P1	P1	P1	P1
	11	12	13	14	15	16	17	18	19	20
	P1	P1	P1	P1	P1	P1	;			

Parameters:
P1 : serial number

SP	**Reads or sets the SPLIT state** *Set* not available during transmission and when MEM mode is activated										Parameters: P1 : '0' : SPLIT OFF '1' : REMOTE SPLIT ON '2' : STAND ALONE SPLIT ON
Set	1	2	3	4	5	6	7	8	9	10	
	S	P	P1	;							
Read	1	2	3	4	5	6	7	8	9	10	
	S	P	;								
Answer	1	2	3	4	5	6	7	8	9	10	
	S	P	P1	;							

SQ	**Reads or sets the squelch value**										Parameters: P1 : always 0 P2 : squelch value: 0: OFF 1-10: ON
Set	1	2	3	4	5	6	7	8	9	10	
	S	Q	P1	P2	P2	P2	;				
Read	1	2	3	4	5	6	7	8	9	10	
	S	Q	P1	;							
Answer	1	2	3	4	5	6	7	8	9	10	
	S	Q	P1	P2	P2	P2	;				

SW	**Sends/sets the CW message to send** *Set* available in transmission only if P1 and P2 are 0 See also CM and CP commands										Parameters: P1 "000" and P2 '0' : stops the CW Message transmission P1 "000" e P2 '1' : starts the CW Message transmission P1 "001 - 010" and P2 '0' : sets the number (1 to 10) of the CW message to send P1 "001 - 010" and P2 '1' : sends the CW Message with number P1 (1 to 10) P3 : the number of the CW Message to send P4 : '1' during the transmission of the CW message, otherwise '0'
Set	1	2	3	4	5	6	7	8	9	10	
	S	W	P1	P1	P1	P2	;				
Read	1	2	3	4	5	6	7	8	9	10	
	S	W	;								
Answer	1	2	3	4	5	6	7	8	9	10	
	S	W	P3	P3	P3	P4	;

TB	**Reads or sets the transmission bandwidth** *Set* not available during transmission										Parameters: P1 : always '0' P2 : see parameter details below
Set	1	2	3	4	5	6	7	8	9	10	
	T	B	P1	P2	P2	;					
Read	1	2	3	4	5	6	7	8	9	10	
	T	B	P1	;							
Answer	1	2	3	4	5	6	7	8	9	10	
	T	B	P1	P2	P2	;					

TB command – P2 parameter

P2	LOW FREQUENCY	HIGH FREQUENCY
00	50Hz	4000Hz
01	100Hz	2700Hz
02	100Hz	3000Hz
03	100Hz	3500Hz
04	100Hz	4000Hz
05	200Hz	2700Hz
06	200Hz	3000Hz
07	200Hz	3500Hz
08	200Hz	4000Hz
09	300Hz	2700Hz
10	300Hz	3000Hz
11	300Hz	3500Hz
12	300Hz	4000Hz

TC	**Reads or sets the action to do when pressing the microphone PTT while in CW mode** *Set* not available during transmission										Parameters: P1 : '0' : CW message preparation '1' : PTT OUT output assertion
Set	1	2	3	4	5	6	7	8	9	10	
	T	C	P1	;							
Read	1	2	3	4	5	6	7	8	9	10	
	T	C	;								
Answer	1	2	3	4	5	6	7	8	9	10	
	T	C	P1	;							

TE	**Reads or sets the transmitter status** *Set* not available during transmission										Parameters: P1 : '0' : disabled '1' : enabled
Set	1	2	3	4	5	6	7	8	9	10	
	T	E	P1	;							
Read	1	2	3	4	5	6	7	8	9	10	
	T	E	;								
Answer	1	2	3	4	5	6	7	8	9	10	
	T	E	P1	;

TH	**Reads or sets the AGC threshold value** See also GC and GS commands										Parameters: P1: AGC threshold, from 0 (OFF) to 10
Set	1	2	3	4	5	6	7	8	9	10	
	T	**H**	**P1**	**P1**	**;**						
Read	1	2	3	4	5	6	7	8	9	10	
	T	**H**	**;**								
Answer	1	2	3	4	5	6	7	8	9	10	
	T	**H**	**P1**	**P1**	**;**						

TI	**Reads or sets the transmission input** *Set* not available during transmission										Parameters: P1 : '0' : microphone '1' : USB audio '2' : Auto
Set	1	2	3	4	5	6	7	8	9	10	
	T	**I**	**P1**	**;**							
Read	1	2	3	4	5	6	7	8	9	10	
	T	**I**	**;**								
Answer	1	2	3	4	5	6	7	8	9	10	
	T	**I**	**P1**	**;**							

TL	**Reads or sets the tune transmission power** See also TP and TQ commands										Parameters: P1 : 0: 0.3W 1: 0.5W 2: 1.0W 3: 1.2W 4: 1.5W 5: 2.0W 6: 3.0W 7: 4.0W 8: 5.0W 9: MAX
Set	***1***	***2***	***3***	***4***	***5***	***6***	***7***	***8***	***9***	***10***	
	T	L	P1	P1	;						
Read	***1***	***2***	***3***	***4***	***5***	***6***	***7***	***8***	***9***	***10***	
	T	L	;								
Answer	***1***	***2***	***3***	***4***	***5***	***6***	***7***	***8***	***9***	***10***	
	T	L	P1	P1	;						

TP	**Reads or sets the transmission power** See also TL and TQ commands										Parameters: P1 : 0: 0.3W 1: 0.5W 2: 1.0W 3: 1.2W 4: 1.5W 5: 2.0W 6: 3.0W 7: 4.0W 8: 5.0W 9: MAX
Set	1	2	3	4	5	6	7	8	9	10	
	T	**P**	**P1**	**P1**	**;**						
Read	1	2	3	4	5	6	7	8	9	10	
	T	**P**	**;**								
Answer	1	2	3	4	5	6	7	8	9	10	
	T	**P**	**P1**	**P1**	**;**

TQ	**Reads or sets the transmission power in a fine way** See also TL and TP commands										Parameters: P1: transmission power in mW, accepted values are 0.1W to 5.0W in 0.1W steps, 0 means MAX
Set	1	2	3	4	5	6	7	8	9	10	
	T	Q	P1	P1	P1	P1	;				
Read	1	2	3	4	5	6	7	8	9	10	
	T	Q	;								
Answer	1	2	3	4	5	6	7	8	9	10	
	T	Q	P1	P1	P1	P1	;				

TR	**Reads or sets the activation status of the RTS transmission.** *Set* not available during transmission									Parameters: P1: '0': OFF '1': ON
Set	1	2	3	4	5	6	7	8	9	10	
	T	R	P1	;							
Read	1	2	3	4	5	6	7	8	9	10	
	T	R	;								
Answer	1	2	3	4	5	6	7	8	9	10	
	T	R	P1	;							

TT	**Reads or sets the output type for the transmission** *Set* not available during transmission										Parameters: P1: '0' : POWER (RTX ANTENNA) '1' : 0dBm (RF OUT)
Set	1	2	3	4	5	6	7	8	9	10	
	T	T	P1	;							
Read	1	2	3	4	5	6	7	8	9	10	
	T	T	;								
Answer	1	2	3	4	5	6	7	8	9	10	
	T	T	P1	;							

TU	**Reads or sets the time out value of the tune function** *Set* not available during transmission										Parameters: P1: time out value in seconds: "003" "005" ~ "120" in 5 dots step
Set	1	2	3	4	5	6	7	8	9	10	
	T	U	P1	P1	P1	;					
Read	1	2	3	4	5	6	7	8	9	10	
	T	U	;								
Answer	1	2	3	4	5	6	7	8	9	10	
	T	U	P1	P1	P1	;					

TV	**Reads or sets the default parameter to be displayed during a transmission**										Parameters: P1: '0': frequency '1': forward power '2': reflected power '3': SWR
Set	1	2	3	4	5	6	7	8	9	10	
	T	V	P1	;							
Read	1	2	3	4	5	6	7	8	9	10	
	T	V	;								
Answer	1	2	3	4	5	6	7	8	9	10	
	T	V	P1	;							

© 2020 ELAD S.r.l. All rights reserved. No part of this document may be reproduced, published, used, disclosed or disseminated in any form or by any means, electronic, photocopying or otherwise, without prior written permission of ELAD S.r.l.

TX	**Sets the transceiver in TX mode** See also RX command										Parameters: P1: '0' and '1': normal transmission (MIC or USB) '2': tune transmission (CW tone) P2: always '0'
Set	1	2	3	4	5	6	7	8	9	10	
	T	X	P1	;							
Read											
Answer	1	2	3	4	5	6	7	8	9	10	
	T	X	P2	;							

UD	**Reads or sets the acceleration of the mic up/down buttons**										Parameters: P1: from 1 to 3
Set	1	2	3	4	5	6	7	8	9	10	
	U	D	P1	;							
Read	1	2	3	4	5	6	7	8	9	10	
	U	D	;								
Answer	1	2	3	4	5	6	7	8	9	10	
	U	D	P1	;							

UU	**Activates the UI update mode**										Parameters: P1 : always '1' P2 : "5214" P3 : result: '0' error '1' ok
Set	1	2	3	4	5	6	7	8	9	10	
	U	U	P1	P2	P2	P2	P2	;			
Read											
Answer	1	2	3	4	5	6	7	8	9	10	
	U	U	P3	;							

VA	**Reads or sets the auxiliary volume** See also VM and VT commands										Parameters: P1: "000" ~ "100"
Set	1	2	3	4	5	6	7	8	9	10	
	V	A	P1	P1	P1	;					
Read	1	2	3	4	5	6	7	8	9	10	
	V	A	;								
Answer	1	2	3	4	5	6	7	8	9	10	
	V	A	P1	P1	P1	;					

VE	**Do VFOs equal** *Set* not available during transmission *Set* not available if split mode is active *Set* not available if in MEM mode										Parameters: P1: '1' : set the VFO not active with the parameters of the active VFO and change VFO '2' : set the active VFO with the VFO parameters not active, it does not change VFO P2: always '0'
Set	1	2	3	4	5	6	7	8	9	10	
	V	E	P1	;							
Read											
Answer	1	2	3	4	5	6	7	8	9	10	
	V	E	P2	;

VM	**Reads or sets the main volume** See also VA and VT commands										Parameters: P1: “000” ~ “015” “020” ~ “100” in 5 dots step
Set	1	2	3	4	5	6	7	8	9	10	
	V	M	P1	P1	P1	;					
Read	1	2	3	4	5	6	7	8	9	10	
	V	M	;								
Answer	1	2	3	4	5	6	7	8	9	10	
	V	M	P1	P1	P1	;					

VS	**Reads the FDM-DUO firmware versions**										Parameters: P1: firmware identifier character ‘I’ : User Interface ‘F’ : FPGA ‘U’ : USB ‘R’ : Rx Demodulator ‘T’ : Tx Modulator P2: firmware version in the format “xx.yy” with : - “xx“ major number - “yy“ minor number
Set											
Read	1	2	3	4	5	6	7	8	9	10	
	V	S	P1	;							
Answer	1	2	3	4	5	6	7	8	9	10	
	V	S	P1	P2	P2	P2	P2	P2	;		

VT	**Reads or sets the sidetone volume** See also VA and VM commands										Parameters: P1: “000” ~ “100”
Set	1	2	3	4	5	6	7	8	9	10	
	V	T	P1	P1	P1	;					
Read	1	2	3	4	5	6	7	8	9	10	
	V	T	;								
Answer	1	2	3	4	5	6	7	8	9	10	
	V	T	P1	P1	P1	;					

© 2020 ELAD S.r.l. All rights reserved. No part of this document may be reproduced, published, used, disclosed or disseminated in any form or by any means, electronic, photocopying or otherwise, without prior written permission of ELAD S.r.l.

WR	**Reads SWR**									
Set										
Read	***1***	***2***	***3***	***4***	***5***	***6***	***7***	***8***	***9***	***10***
	W	R	;							
Answer	***1***	***2***	***3***	***4***	***5***	***6***	***7***	***8***	***9***	***10***
	W	R	P1	P2	P3	P3	P4	P5	P5	;

Parameters:

P1 : usually '0', set to '1' if DUO switches automatically to reception because of a high SWR (it corresponds to HI SWR on the DUO's display)

P2 : ' '(blank) o '!' in case of an unreliable SWR value, i.e. :
- DUO is in RX mode
- DUO is in TX mode with 0dBm
- if direct power is less than the minimum value for SWR computation (at present 500mW – could be changed)
- if SWR value is not compatible with the command format

P3 : integer part of SWR

P4 : always '.'

P5 : decimal part of SWR

WT	**Reads or sets the CW Rx threshold** See also DE command									
Set	*1*	*2*	*3*	*4*	*5*	*6*	*7*	*8*	*9*	*10*
	W	**T**	**P1**	**P1**	**;**					
Read	*1*	*2*	*3*	*4*	*5*	*6*	*7*	*8*	*9*	*10*
	W	**T**	**;**							
Answer	*1*	*2*	*3*	*4*	*5*	*6*	*7*	*8*	*9*	*10*
	W	**T**	**P1**	**P1**	**;**					

Parameters:

P1: threshold value
0 : auto mode
from 1 to 10 : manual values

6.3.3 Compatibility commands

The following commands have no effect on the transceiver, they only ensure the compatibility of the FDM-DUO with Ham Radio Deluxe.

AG											Parameters:
Set	1	2	3	4	5	6	7	8	9	10	P1: Always 0
											P2: Always 000
Read	1	2	3	4	5	6	7	8	9	10	
	A	G	P1	;							
Answer	1	2	3	4	5	6	7	8	9	10	
	A	G	P1	P2	P2	P2;					

AI											Parameters:
Set	1	2	3	4	5	6	7	8	9	10	P1: Always 0
Read	1	2	3	4	5	6	7	8	9	10	
	A	I	P1	;							
Answer	1	2	3	4	5	6	7	8	9	10	
	A	I	P1	;							

BC											Parameters:
Set	1	2	3	4	5	6	7	8	9	10	P1: Always 0
Read	1	2	3	4	5	6	7	8	9	10	
	B	C	;								
Answer	1	2	3	4	5	6	7	8	9	10	
	B	C	P1	;							

BY											Parameters:
Set	1	2	3	4	5	6	7	8	9	10	P1: Always 0
											P2: Always 0
Read	1	2	3	4	5	6	7	8	9	10	
	B	Y	;								
Answer	1	2	3	4	5	6	7	8	9	10	
	B	Y	P1	P2	;						

CA											Parameters:
Set	1	2	3	4	5	6	7	8	9	10	P1: Always 0
Read	1	2	3	4	5	6	7	8	9	10	
	C	A	;								
Answer	1	2	3	4	5	6	7	8	9	10	
	C	A	P1	;							

CN											Parameters:
Set	1	2	3	4	5	6	7	8	9	10	P1: Always 00
Read	1	2	3	4	5	6	7	8	9	10	
	C	N	;								
Answer	1	2	3	4	5	6	7	8	9	10	
	C	A	P1	P1	;

CT											Parameters:
Set	1	2	3	4	5	6	7	8	9	10	P1: Always 0
Read	1	2	3	4	5	6	7	8	9	10	
	C	T	;								
Answer	1	2	3	4	5	6	7	8	9	10	
	C	T	P1	;							

DL											Parameters:
Set	1	2	3	4	5	6	7	8	9	10	P1: Always 0
											P2: Always 00
Read	1	2	3	4	5	6	7	8	9	10	
	D	L	;								
Answer	1	2	3	4	5	6	7	8	9	10	
	D	L	P1	P2	P2	;					

EX											Parameters:
Set	1	2	3	4	5	6	7	8	9	10	P1: 000 - 060: Menu No.
											P2: Always 00
Read	1	2	3	4	5	6	7	8	9	10	P3: Always 0
	E	X	P1	P1	P1	P2	P2	P3	P4	;	P4: Always 0
Answer	1	2	3	4	5	6	7	8	9	10	P5: Always 0
	E	X	P1	P1	P1	P2	P2	P3	P4	P5	
	11	12	13	14	15	16	17	18	19	20	
	P5	;									

FS											Parameters:
Set	1	2	3	4	5	6	7	8	9	10	P1 Always 0
Read	1	2	3	4	5	6	7	8	9	10	
	F	S	;								
Answer	1	2	3	4	5	6	7	8	9	10	
	F	S	P1	;							

FW											Parameters:
Set	1	2	3	4	5	6	7	8	9	10	P1 Always 0000
Read	1	2	3	4	5	6	7	8	9	10	
	F	W	;								
Answer	1	2	3	4	5	6	7	8	9	10	
	F	W	P1	P1	P1	P1	;				

GT											Parameters:
Set	1	2	3	4	5	6	7	8	9	10	P1 Always 000
Read	1	2	3	4	5	6	7	8	9	10	
	G	T	;								
Answer	1	2	3	4	5	6	7	8	9	10	
	G	T	P1	P1	P1	;

7 Software & Drivers Installation

7.1 FDM-SW2 Software

7.1.1 First-time install

Download from the ELAD website http://sdr.eladit.com/FDM-sw2 Software/Current release/ the latest **Complete** version. Double-click on the file "setup.exe" inside the folder and follow the instructions. Windows Installer will first install the prerequisites "Microsoft VC++ 2010 Runtime Libraries" and "Microsoft .NET Framework 4.0" and then the FDM-SW2 software.

7.1.2 Update an existing version

Download from the ELAD website http://sdr.eladit.com/FDM-sw2 Software/Current release/ the latest **Only Installer** version. Double click on file "ELAD_FDMSW2Setup_v_x.y.msi" included in the update and follow the instructions.

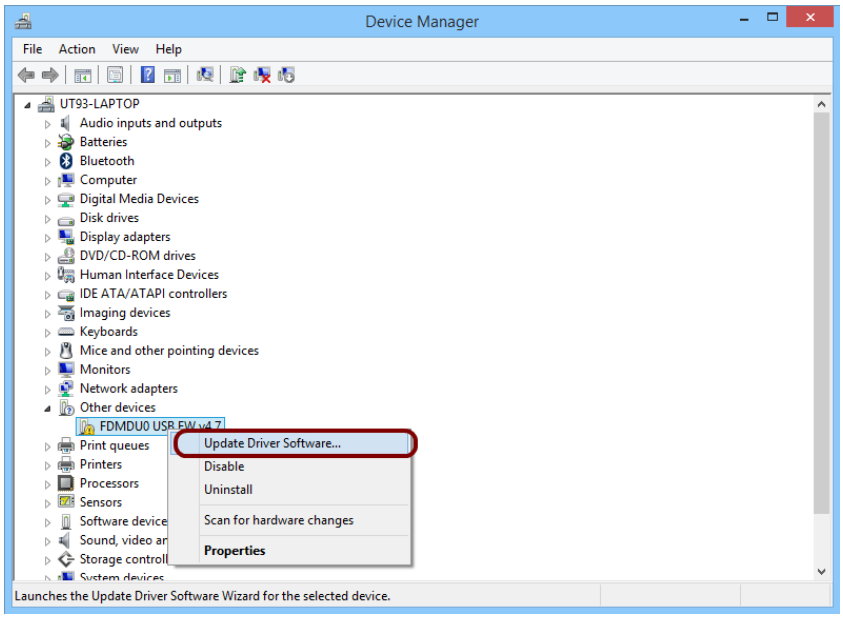
7.2 RX USB Driver

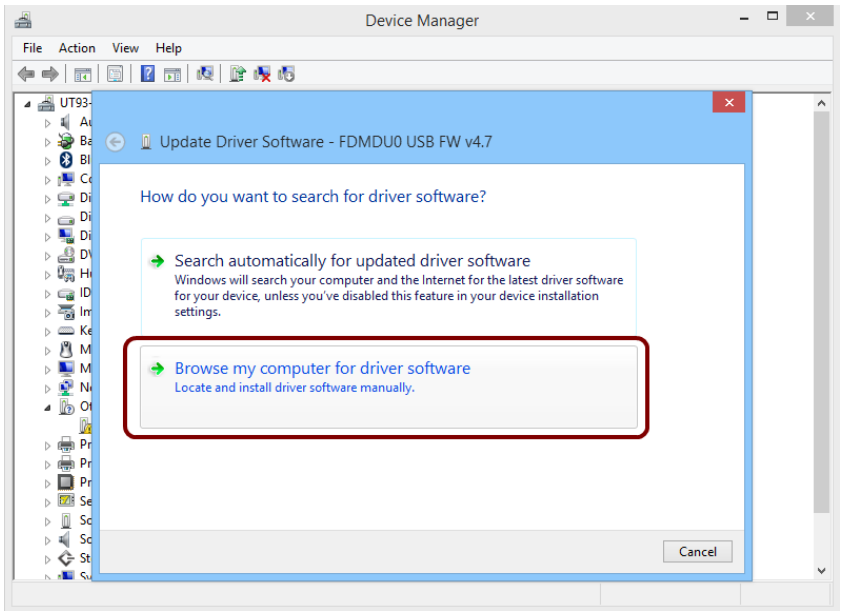
7.2.1 First driver installation

To install the RX USB driver, connect the RX USB port of the FDM-DUO to a USB port of your computer and power on the FDM-DUO. When Windows detects the new hardware, follow the steps listed below to install the driver correctly.

Open the **Device Manager**, expand **Other devices** and locate the FDM-DUO node. Select FDM-DUO, right click on it and execute **Update Driver Software**.



When Windows starts the installation procedure, select the option **Browse my computer for driver software** (the second option).

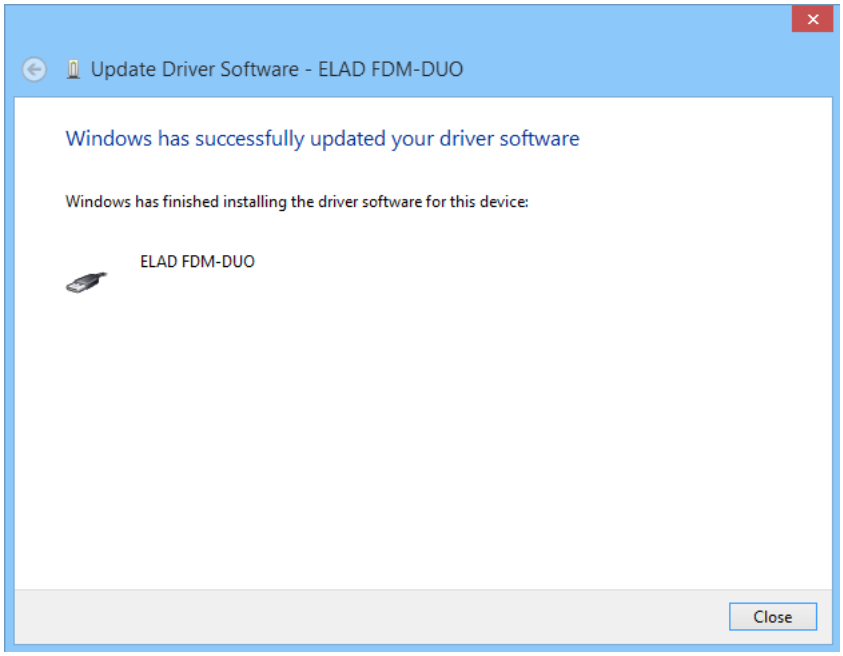


© 2020 ELAD S.r.l. All rights reserved. No part of this document may be reproduced, published, used, disclosed or disseminated in any form or by any means, electronic, photocopying or otherwise, without prior written permission of ELAD S.r.l.

In the next window, insert the driver folder location using the **Browse** button and check the option **Include subfolders**, in this way the manual driver search is enabled. Select the folder: **C:\Program Files (x86)\ ELAD\ELAD FDM-SW2\ELAD_FDM_Driver** then click **Next**.

Click **Install**.

Let the hardware installation complete automatically.

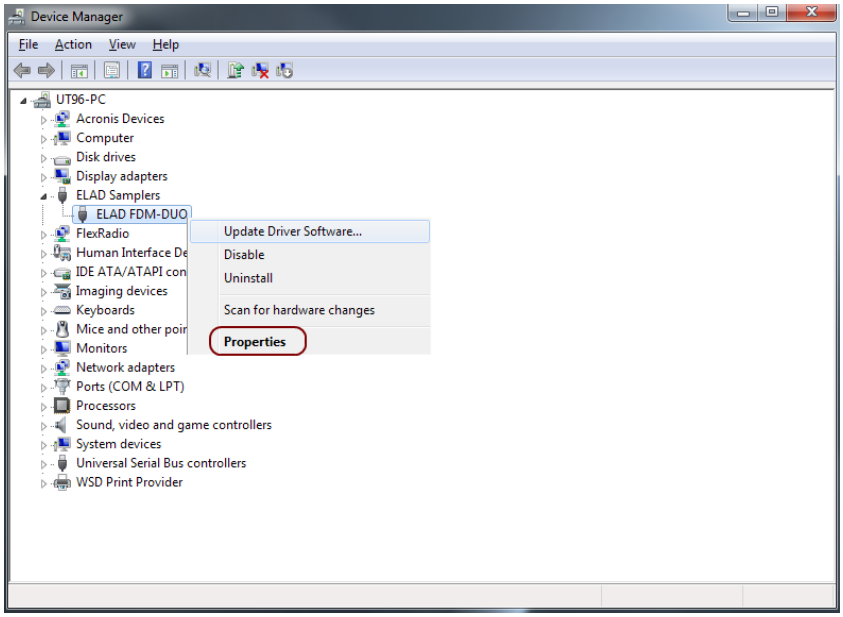


At the procedure ending, click on **Close**, then disconnect and reconnect the FDM-DUO on the same USB port. Now the RX USB driver of the FDM-DUO is installed on your computer.

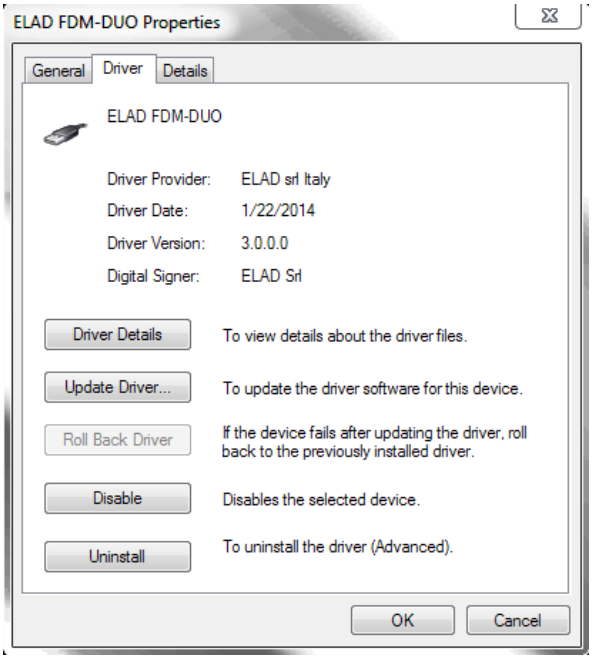
© 2020 ELAD S.r.l. All rights reserved. No part of this document may be reproduced, published, used, disclosed or disseminated in any form or by any means, electronic, photocopying or otherwise, without prior written permission of ELAD S.r.l.

7.2.2 Driver installation check

To check the driver current version, connect the FDM-DUO to the computer USB port where the driver is already installed and power on the FDM-DUO. Open the **Device Manager**, expand the **ELAD Samplers** node, right click on **ELAD FDM-DUO** and select **Properties**.



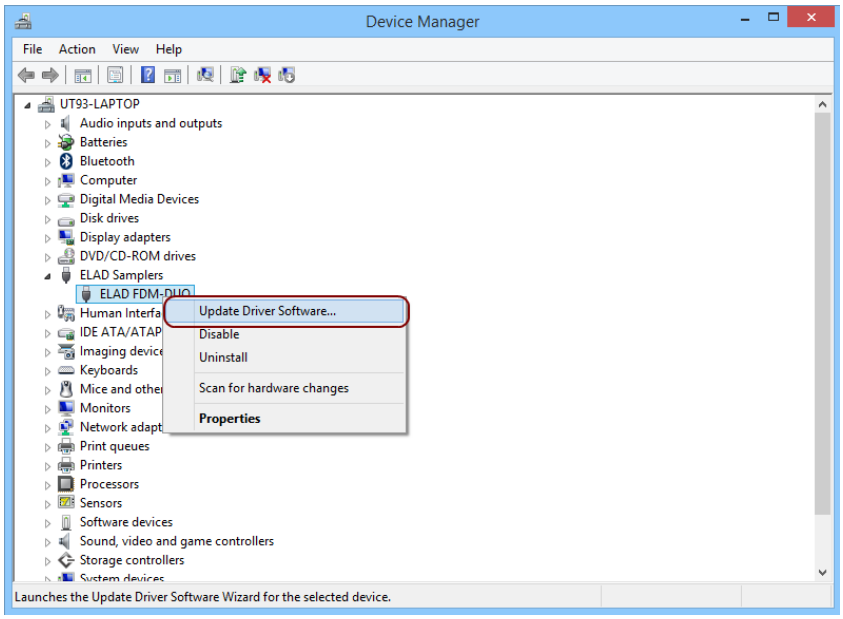
When the window opens, select the **Driver** tab. You can read provider name, current driver release date and current driver version. The picture below gives an example.



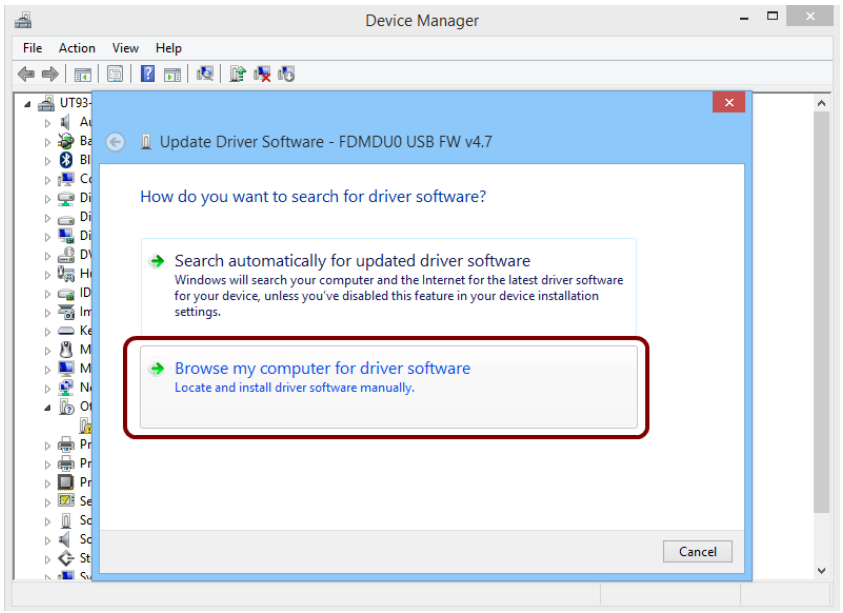
© 2020 ELAD S.r.l. All rights reserved. No part of this document may be reproduced, published, used, disclosed or disseminated in any form or by any means, electronic, photocopying or otherwise, without prior written permission of ELAD S.r.l.

7.2.3 Manual driver update

To update the driver, connect the FDM-DUO to the computer USB port where the driver is already installed and power on the FDM-DUO. Open the **Device Manager**, expand the **ELAD Samplers** node, right click on **ELAD FDM-DUO** and execute **Update Driver Software**.

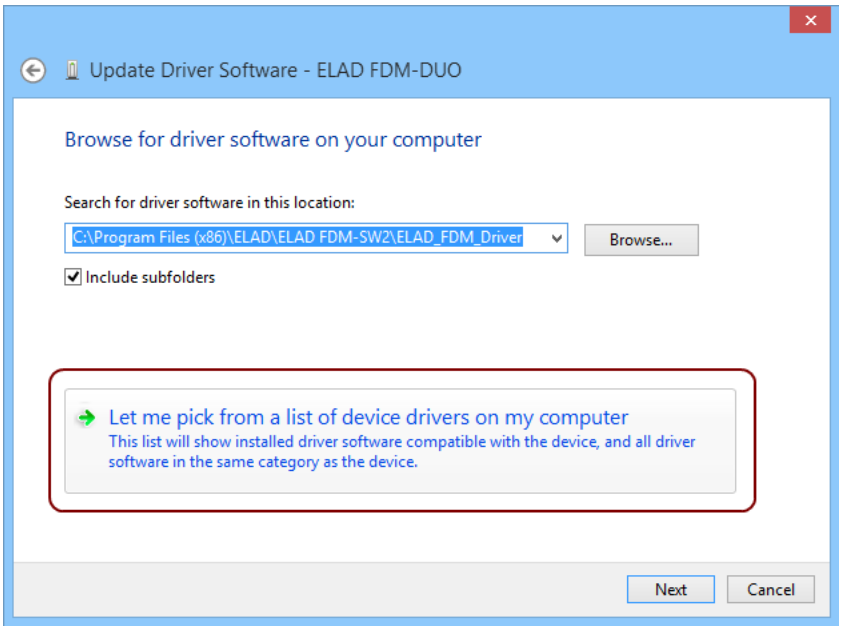


When Windows starts the installation procedure, select the option **Browse my computer for driver software**.

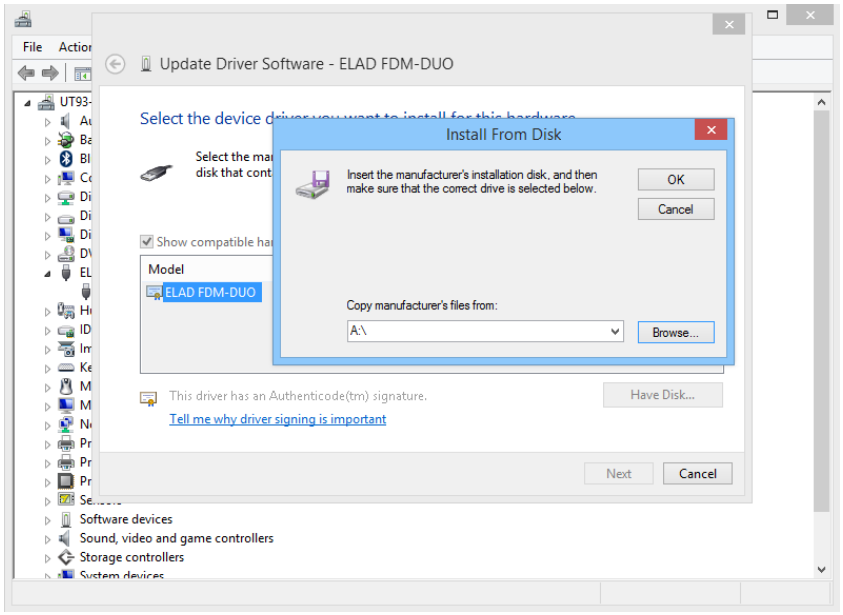


© 2020 ELAD S.r.l. All rights reserved. No part of this document may be reproduced, published, used, disclosed or disseminated in any form or by any means, electronic, photocopying or otherwise, without prior written permission of ELAD S.r.l.

In the next window, disable the option **Include subfolders** and choose **Let me pick from a list of device drivers on my computer**. Don't click Next.



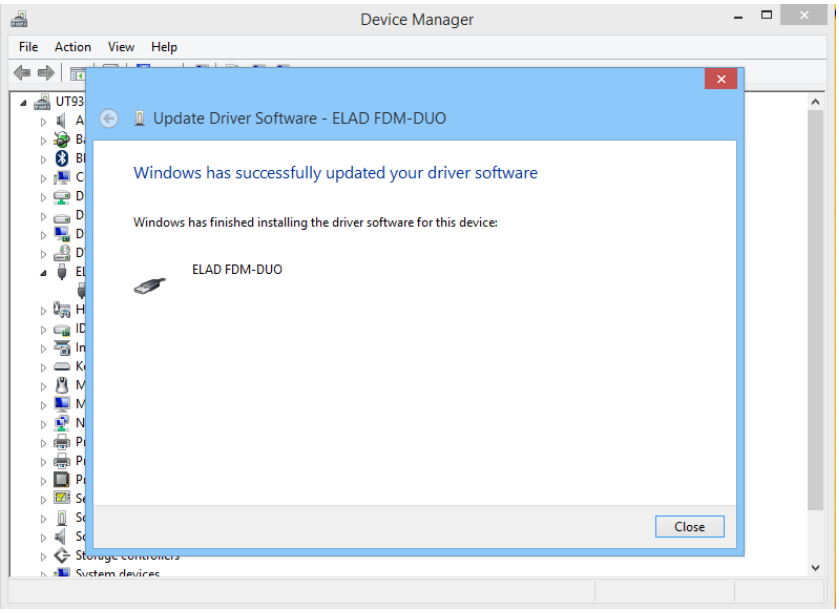
Verify that **Show compatible hardware** option is checked and ELAD FDM-DUO is selected, then click on **Have a Disk**. In this way the manual driver update is enabled. Don't click Next.



Click on **Browse** and search for the FDM-DUO driver update folder location, then open `winusb_fdmsampler.inf` file. Click **OK** and then **Next**.

© 2020 ELAD S.r.l. All rights reserved. No part of this document may be reproduced, published, used, disclosed or disseminated in any form or by any means, electronic, photocopying or otherwise, without prior written permission of ELAD S.r.l.

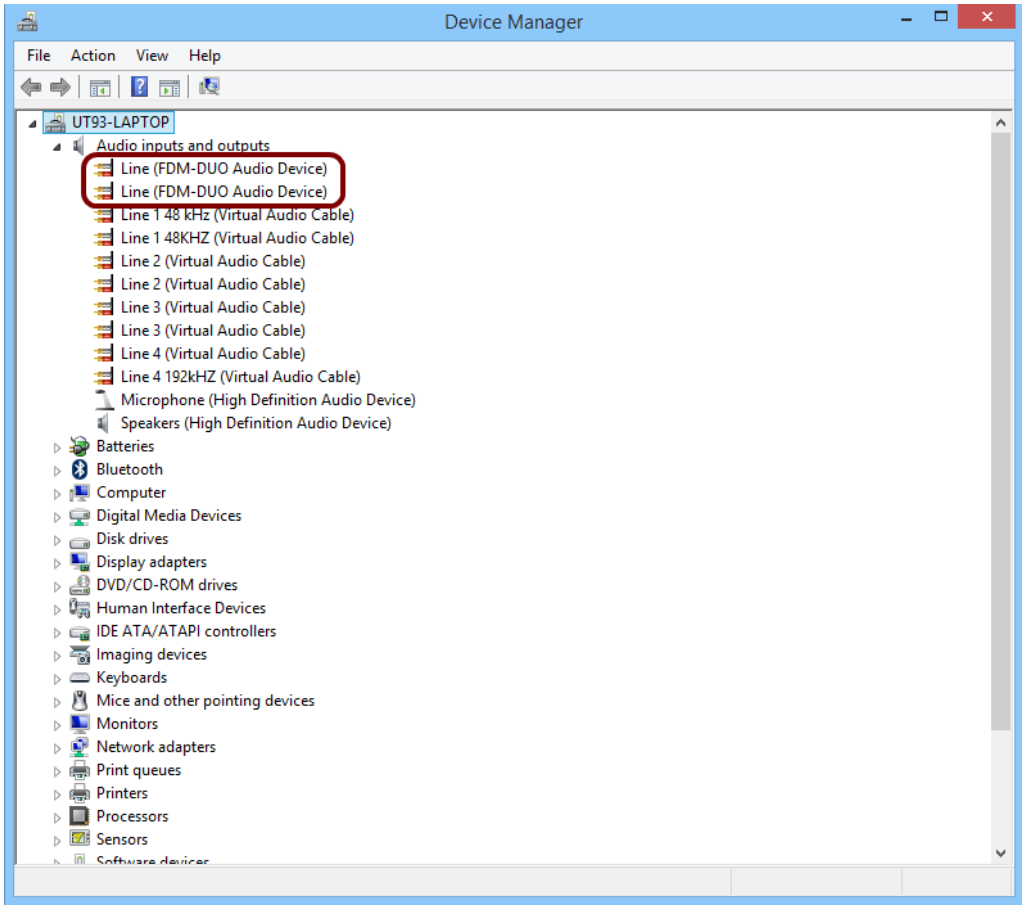
Let the hardware installation complete automatically, at the procedure ending click on **Close**, then disconnect and reconnect the FDM-DUO device on the same USB port.



© 2020 ELAD S.r.l. All rights reserved. No part of this document may be reproduced, published, used, disclosed or disseminated in any form or by any means, electronic, photocopying or otherwise, without prior written permission of ELAD S.r.l.

7.3 USB Soundcard

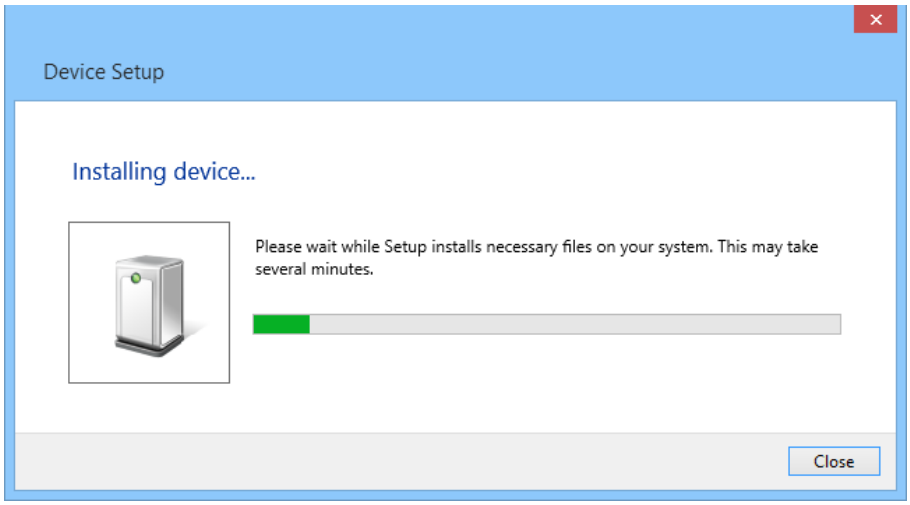
Connect the TX USB port of the FDM-DUO to a USB port of your computer, power on the FDM-DUO and open the **Device Manager**. No driver installation is required for this device, just expand the node **Audio inputs and outputs** and check for the FDM-DUO audio device.



© 2020 ELAD S.r.l. All rights reserved. No part of this document may be reproduced, published, used, disclosed or disseminated in any form or by any means, electronic, photocopying or otherwise, without prior written permission of ELAD S.r.l.

7.4 CAT USB Driver

Connect the CAT USB port of the FDM-DUO to a USB port of your computer. Windows will download and install automatically the FTDI FT232R serial port driver.



When the installation process ends, open the Windows Device Manager and check for the FDM-DUO USB serial port in the node **Ports (COM & LPT)**.

9 Technical Specifications

ELAD FDM-DUO TECHNICAL SPECIFICATIONS

Rev. 1
04/2015

GENERAL	**USB 2.0 Ports (Peripheral Control)**	3 (RX, TX, CAT)
	Master Clock Frequency	122.88 MHz (Rx), 368.64 MHz (Tx)
	Master Clock Phase Noise	-136 dBc @ 100 kHz, -130 dBc @ 10 kHz
	10 MHz Reference Clock Stability	2.5 ppm TCXO within temperature range 0°C ÷ 40°C (32°F ÷ 104°F) Typical Stability within temperature range 15°C ÷ 35°C (59°F ÷ 95°F) 0.1 ppm i.e. 1Hz @ 10 MHz
	Frequency Resolution	1 Hz min.
	Antenna Connectors / Impedance	2x SO-239 / 50 Ohm
	RF-OUT Connector / Impedance	SMA female / 50 Ohm
	Power Supply Requirements	13.8 Vdc ± 10%
	Current Drain (Rx / Tx 5 W)	<500 mA @ 13.8 V / <2.2 A @ 13.8 V
	Dimensions (W x D x H)	180 mm (7.00") x 155 mm (6.10") x 70 mm (2.75") including knob and connectors 180 mm (7.00") x 130 mm (5.10") x 70 mm (2.75") enclosure only
	Weight (approximate)	1.2 Kg (2.4 lb)
	Operating Temperature Range	0°C ÷ 40°C (32°F ÷ 104°F)
Stand Alone Mode	**RECEIVER**	
	Modes	CW, USB, LSB, AM, FM
	ADC Sampling Rate / Resolution	122.88 MHz @ 16 bits
	Wideband Frequency Coverage	10 kHz ÷ 54 MHz
	IQ Channel Bandwidth	192 kHz (24 bits)
	Attenuator	12 dB
	Spurious Response	>105 dBfs @ 0 dB attenuation
	DDC Image Rejection Ratio	>100 dB
	Receive Low Pass Filters Bandwidth	SSB: 300 Hz, 600 Hz, 1 kHz, 1.6 kHz ÷ 3.1 kHz (Step 100 Hz), 4 kHz, 5 kHz, 6 kHz AM: 2.5 kHz ÷ 6 kHz (Step 500 Hz) CW: 100 Hz & DR(1) Level 1 ÷ 4, 100 Hz, 300 Hz, 500 Hz, 1kHz, 1.5 kHz, 2.6 kHz FM: Voice Narrow, Voice Wide, Data
	Headphones Connector / Impedance	3.5 mm Stereo Jack / 8 Ohm
	AUX OUT Connector / Impedance	3.5 mm Stereo Jack / 8 Ohm
	TRANSMITTER	
	Modes	CW, USB, LSB, AM, FM
	TX DAC Sampling Rate & Resolution	368.64 MHz @ 16 bits
	RF Output Power	5 W Nominal, Adj. Steps: 0.3 W, 0.5 W, 1.0 W, 1.2 W, 1.5 W, 2.0 W, 3.0 W, 4.0 W, 5.0 W, MAX
	Amateur Band Coverage at Rated Power Output	160 m ÷ 6 m
	Low Pass PA Filter Bands	160 m ÷ 6 m Ham bands only
	RF-OUT Output Power	-2 dBm Typical; 0 dBm Max
	RF-OUT Frequency Coverage	100 kHz ÷ 165 MHz
	Modulation System	IQ Digital
	Maximum FM Deviation	5 kHz
	Carrier Suppression / Unwanted Sideband Suppression	>80 dBc Typical / >80 dBc Typical
	Harmonic Radiation 1.8 - 50 MHz Amateur Bands	>60 dBc
	3rd Order IMD	160 m ÷ 10 m: >30 dB @ 5 W PEP; 6 m: >25 @ 5 W PEP
	Transmit Filters Bandwidth	SSB, AM: 300 Hz ÷ 2700 Hz Band Pass up to 50 Hz ÷ 4000 Hz Band Pass FM: 2500 Hz or 5000 Hz Low Pass
	Microphone Connectors	RJ45 ICOM Compatible
	Microphone Impedance	600 Ohm Nominal (200 ÷ 10 kOhm)
	PTT-OUT Connector	3.5 mm Stereo Jack, NPN Open Collector Output 20 V Max / 200 mA
	KEY-PAD Connector	3.5 mm Stereo Jack
PC Based Mode (ELAD FDM-SW2 Software)	**RECEIVER**	
	Modes	CW, CW SH+, CW SH-, CW Narrow Band, USB, LSB, AM, FM, WB FM (Stereo + RDS), SYNC AM, DSB, RTTY, ECSS, DRM
	IQ DDC Sampling Rate / Resolution	1 Channel (Slice) @ 32 bits: 192 kHz, 384 kHz, 768 kHz, 1536 kHz, 3072 kHz 1 Channel (Slice) @ 16 bits: 6144 kHz 2 Channels (Slices) @ 32 bits: 192 kHz, 384 kHz
	Simultaneous Receivers	4 with 1 Channel (Slice) DDC, 8 with 2 Channels (Slices) DDC
	Software Defined Filters	Double IF Notch Filters, Continuous Variable Band Filter
	Advanced DSP Features	Noise Blanker, Adaptive Noise Reducer, Adaptive Auto Notch, AGC
	Main Software Features	Recording and playback of IF and audio data stream, EIBI database support, Dx-Cluster spot visualization (Internet connection required), built in CAT protocol and Omni-Rig Server, double output channel (for VAC), support for external down-converter, WoodBox Tmate and Tmate2 compatibility
	Software Visualization	Input Data (Spectrum + Waterfall), IF Data (Spectrum + Waterfall), Audio Data (Spectrum + Waterfall)
	TRANSMITTER	
	Modes	CW, USB, LSB, AM, FM, IQ
	Transmit Bandwidth	CW, USB, LSB, AM: default 300 ÷ 2700 Hz, up to 50 ÷ 4000 Hz FM: 2500 or 5000 Hz Low Pass
	Advanced DSP Features	Equalizer, VOX, Audio Compressor, Overshoot Control (CESSB Algorithm), Level Limiter
	Main Software Features	Playback of audio files (up to 4 presets)
	Software Visualization	Waveform Monitor (Input Audio, Equalizer Output, Compressor Output, Filter Output, Overshoot Controller Output, Modulator Output, Limiter Output)

(1) Digital Resonator

All stated specifications and other product information provided in this document are subject to change without notice or obligation.

Product Warranty

ELAD S.r.l. warrants the FDM-DUO for a period of 2 years inside Europe, and for a period of 1 year outside Europe unless otherwise specified. Warranty begins from the purchase date. All FDM-DUO will be repaired or replaced due to malfunction resulting from no fault of the end user. This warranty covers normal intended usage of the product and does not cover misuse, abuse, accidents, viruses, unauthorized service parts or the combination of other unauthorized branded products used in conjunction with the FDM-DUO.

Declaration of Conformity (EC)

The product marked as

FDM-DUO

manufactured by

Manufacturer: ELAD S.r.l.

Address: Via Col De Rust, 11 - Sarone
33070 CANEVA (PN)

is produced in conformity to the requirements contained in the following EC directives:

- R&TTE Directive 1999/5/CE
- EMC Directive 2004/108/CE
- Low Voltage Directive 2006/95/CE
- RoHS Directive 2011/65/CE

The product conforms to the following Product Specifications:

Emissions & Immunity:
ETSI EN 301 489-1 V1.9.2
ETSI EN 301 489-15 V1.2.1
ETSI EN 301 783-2 V1.2.1

Safety:
EN 60950-1:2006 + A11:2009 + A1:2010 + A12:2011 + A2:2013

And further amendments.

This declaration is under responsibility of the manufacturer:

ELAD S.r.l.
Via Col De Rust, 11 - Sarone
33070 CANEVA (PN)

Issued by:

Name: Franco Milan
Function: President of ELAD

Declaration of Conformity (FCC)

The product marked as

FDM-DUO

manufactured by

Manufacturer:	ELAD S.r.l.
Address:	Via Col De Rust, 11 - Sarone 33070 CANEVA (PN)

complies with the following requirements:
- FCC (Federal Communications Commission) Part 15

Operation is subject to the following two conditions:
(1) This device may not cause harmful interference, and
(2) This device must accept any interference received, including interference that may cause undesired operation.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Changes or modification not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

FCC ID: 2AAE5FDM-DUO
